Scrofula, or King's Evil,

Scrolula, or king's Evil, is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poer. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venercal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the red of Hum who says, "I will visit the iniquities of the fathers upon their children."

the energies of life, so that scrofulous constitutions not only suffer from scrofulous complanifs, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders
which although not scrofulous in their nature,
are still rendered fatal by this taint in the
system. Most of the consumption which decimates the human family has its origin directlyin this scrofulous contamination; and many
destructive diseases of the liver, kidneys, brain,
and, indeed, of all the organs, arise from or
are aggravated by the same cause.

One quarter of all our people are scrofulous;
their persons are invaded by this burking infection, and their health is undermined by it.
To pleamse it from the system we must renewate
the blood by an alterntive medicine, and invigorate it by healthy food and exercise,
Such a medicine we supply in

AYERS Compound Extract of Sarsaparilla,

Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the resense of the system from its destructive consequences. Hence it should be employed for the cure affections which arise from it, such as Energive and Saix Discover, St. Anthony's First, Rose, or Environtal, Prince, Perfect, Rose, or Environtal, Prince, Prince, Princ

Patients in advanced stages of the discusses.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over, every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afficted they can never forget, and produced cures too nunerous and too remarkable to be fargetten.
