An effort of one paper to helittle the application for a change in this law, and to assert that it is merely to please U. S. hunters, and for the benefit of Canadian railways, is not justified. Canadian railways may get as much as \$25 per head from a sportsman who hunts big game, which is equivalent to from 10 to 20 per cent. of the cash a sportsman will leave in Canada for provisions, guides and cance, provincial license fee, duties on his ammunition, etc. Stringent regulations are enforced by the customs when the person is shipping the hunting paraphernalia in. He is required to pay duty on everything, all of which is refunded, except duty on ammunition, provided it is exported within a reasonable time.
