

Hi-I'm Norm Rebin ... Quit glaring, I realize that means nothing to you now but just wait ! ! For what? - - - why for this year's CUP COLUMN - - - (didn't you read last week's newspaper) - - - I'm editing it. SO WHAT? So what? Well I just thought that since I'm the new exchange student from Saskatchewan and you don't know me and I don't know you, and maybe - - - Well - - - What I meant to say was - - - QUIT THE PREAMBLE REBIN and LET'S RAMBLE! Aw gosh, then I've got a chance, Thanks kids.

While perusing the columns of a Western College newspaper—the *Sheaf* (located somewhere in the wilderness they call S A S K A T C H E W A N) I noticed that the question of "higher education" for women is still a major and controversial issue on that campus. Figuring that this is a nationwide problem, I attempted to elicit the sentiments of a 'sincere but skeptical' male resident of Dal Men's Residence on this matter. This in brief, was the result of my interview.

Query: Do you feel that educated women can make a greater contribution to society than an un-educated woman.

Answer: Look son, any woman will tell you that there's no such thing as an un-educated female. Besides, since when did women need brains 'to contribute' to society?

Query: (Hopefully) Well then, do you feel that women who have received 'greater scholastic experience' make the best wives?

Answer: It depends, son, in what 'scholastic realms' these women have been 'experienced'.

Well there it is. It's quite obvious that today's woman is 'on probation' in fields of higher education and time only will tell. For my part all I can say is - - - Gripes - - - what will they think of next? - - - educated women, my eye ! !

While rambling through the Acadian Athanaeum, (don't ask me, I can't pronounce it either - - - I've been told though that if you place your fingers in your mouth, hold your nose and exhale rapidly the pronunciation will come) I noticed that the editorial staff there is voicing great interest in quote "All kinds of literary work of high and intellectual calibre" be it news, poetry, essays, jokes, gossip, or cartoons. I'm glad to report that your problem is solved fellows. The Dal-housie staff has decided to issue you a free subscription of the "Gazette" for the remainder of this year.

I noticed in the Georgian that freshmen reaction to treatment by 'upperclassmen' was quite an issue. All in all, apparently, fresh there, as practically everywhere throughout Canada (from what we could discern in college newspapers, feel they've been getting a pretty 'fair shake' from their more learned compatriots. In fact, as one freshman I interviewed at Dal commented - - - "Everything taken into consideration, I feel that fresh week has been a rich and rewarding experience. The benevolence, compassion, and extreme tolerance displayed by senior students here has filled me with a kind of 'tender and sentimental' philosophy of life. In fact, I can practically say, now, that I've discovered my greatest longing - - - my one real objective in life" Well, I remarked, that's wonderful, what is it? "To last out a year at Dal so that I could come back next semester and utter to my senior compatriots my most endearing sentiment - - - DROP DEAD ! ! ! - - -"

Ground hockey practices have begun with a large turnout, and Joanne hopes to have two teams which will play against Mount Allison, Acadia, Edgemoor, Kings and Halifax Ladies' College.

A round robin tennis tournament will determine who will participate in the Intercollegiate Tournament to be held here October 18. Volleyball will get underway as soon as ground-hockey ends, and a team will enter a tournament to be held at Mount Allison the end of November. Anyone interested in tumbling will be introduced in the trampoline.

Joanne expects to coach two basketball teams, one to enter in the Halifax City League. Swimming, under Joanne's direction, should take on a new prominence this year in girls' sports. When nights are arranged at the Y.M.C.A. instruction will be given in swimming and diving and, if there is sufficient interest, in synchronized swimming. Joanne is enthusiastic, interested, and helpful. Co-operation on the part of the girls of Dalhousie should certainly result in a most successful year.

ED. NOTE - - - And so till the next time we meet, good bye, good luck and - - - study hard children. - - -

# On To Victory

Joanne Fryers

Merv Shaw

This year Dalhousie Girls' Athletic Club welcomes a new coach, Miss Joanne Fryers, a 1958 graduate of Springfield College. Miss Fryers, or Joanne, as she likes to be called, is a native of Moncton, New Brunswick. She attended Moncton High School for two years where she was active in basketball, badminton, and track and field. After graduating from Horton Academy in Wolfville, she entered Springfield College, Massachusetts, to study Physical Education. During her four years at Springfield, Joanne was a valued member of several athletic teams, playing volleyball and being goalie on the ground hockey team. She was a member of the All-Star Basketball team which won the Western Massachusetts Championship in 1958. While at Springfield Joanne won a sportsmanship medal, and in her Junior year was president of Physical Education Majors. Joanne likes all sports but has a special interest in sailing. During the summers of 1956 and 1957, she was assistant Playground Superintendent for the City of Moncton. Just returned from a summer in Europe, Joanne is full of enthusiasm for her "freshette" year as a coach.

Already Joanne has proved her popularity both on the playing field as a coach and as an ardent organizer of activities on D.G.A.C. nights. Easy to work with, she has a drive which invigorates all who play for her. Her aim is to arouse more interest in girls' sports and also in D.G.A.C. nights in order to give as many as possible pleasant recreation.

While at McGill he worked with Montreal high school teams, and assisted the Redmen head coach in running clinics for coaches and players. This past summer he spent three weeks with the Toronto Argos under the direction of coaches Hamp Pool and Steve Owens, where he "gained valuable training for the position of coach as well as a great deal of football knowledge."

Senior football in the Maritimes, said Merv, although it is still in its early stages, has progressed very rapidly. Comparing it to Ontario football he would place it in a class just below the Ontario Intercollegiate League, and thinks that some of the teams down here could beat certain teams in that league.

When asked about predictions for winners in the NSFL and the Grey Cup Merv felt that the St. F.X. powerhouse would go all the way in local football circles, and from the way things looked now the Hamilton Tiger-Cats were headed for a second consecutive Grey Cup win. St. F.X., Merv said, have got everything this year and are making good use of it.

Besides being an old football hand Merv has also played varsity basketball, and some hockey in high school. Along with football coaching duties he will be taking over the Dal basketball squad this season.

This is Merv's first trip down to the Maritimes and so far he has acquired many favourable impressions. The country reminds him somewhat of his own home in Ontario, and the people he finds friendly and easy to get along with.

Merv Shaw, Dalhousie's freshman physical education director, is a footballer from way back—at least nine years anyway, and at 25 finds himself football coach of the Maritimes largest university.

Born in Kenora, in Ontario's Lake of the Woods district about 150 miles east of the Manitoba border, Merv like many other football greats started his playing career with "the boys" on the street, or in somebody's back yard.

During his four years of university in Montreal, Merv played in the positions of offensive guard and defensive linebacker for the McGill Redmen, and in his fourth year of varsity football was a third draft choice of the Saskatchewan Rough Riders.

While at McGill he worked with Montreal high school teams, and assisted the Redmen head coach in running clinics for coaches and players. This past summer he spent three weeks with the Toronto Argos under the direction of coaches Hamp Pool and Steve Owens, where he "gained valuable training for the position of coach as well as a great deal of football knowledge."

# MEET THE PROFESSORS

## Arts and Science

### Dr. Samuel Spratt

Dr. Samuel Ernest Spratt of Tasmania has been appointed to Dalhousie's Department of English.

Dr. Spratt received his Bachelor of Arts and also his Master's Degree from the University of Melbourne, both with First Class Honours in English. He received his Bachelor of Divinity from the Melbourne College of Divinity, and in 1954 obtained his Doctorate from Columbia University.

His thesis for his Master's Degree "Milton's Art of Prosody" was published by Blackwell's of Oxford, and is recognized as authoritative. His doctoral dissertation was on the education of the seventeenth century scientist and scholar, Sir Thomas Browne. It is hoped that it will be published in the near future under the title of "Tom Browne's Schooldays". He is the author of a volume of poems.

While studying for his doctorate at Columbia, Dr. Spratt taught at Barnard College and Brooklyn College. He then was appointed to the department of English at McGill.

In 1954 he was granted a Nuffield Fellowship and went to Oxford where he continued his studies in seventeenth century literature.

### Dr. A. H. Houston

We are pleased to welcome to the Faculty of Arts and Science Dr. Arthur Hillier Houston as Assistant Professor of Biology in the field of Comparative Physiology. Born in Ottawa, Dr. Houston received his B.Sc. degree from McMaster University in 1954, his M.A. and Ph.D. from the University of British Columbia in 1956 and 1958 respectively, where he served as postgraduate demonstrator.

### A. W. MacIntosh

Alan Wallace MacIntosh has joined the Faculty of Arts and Science. A native of Halifax, he is a graduate of Queen Elizabeth High and received his Bachelor of Arts in 1949, his Master's degree in 1950, and his Bachelor of Education in 1954, all at Dalhousie. He instructed in History at the University of Toronto. His specialty is Canadian History.

### Interview With Moira Kerr

## Annual WUSC International Seminar-Yugoslavia

Moira Kerr, WUSC Chairman on the Dalhousie campus, returned recently from the Ninth Annual World University Service International Seminar held this year in Kotor, Yugoslavia. She was accompanied by Carolyn (Potter) MacGregor and by Professor Guy MacLean. Many friends were made, much valuable information and knowledge was attained, and the following, on a question and answer basis, is a preview of some of the events Moira encountered. Later in the year written reports and illustrated lectures will be given on the seminar.

How were you chosen to represent our university?

Anyone interested applies and the applications are presented to a committee of students and professors for selection. This year we were fortunate in having two of our students selected. The applications were sent to the head office in Toronto where they were affirmed.

Who went with you?

A total of 35 Canadian students representing 23 universities, five professors and the General and Assistant Secretaries to WUSC.

How long was the Seminar and did you stop over anywhere on the way there?

We left Canada on June 23 by plane and arrived in London the next day. We stayed in London until July 4, and then flew to Belgrade where we again stayed several

Welcome... The Students of Dalhousie University Extend a Warm Welcome to Our New Professors, some of whom are Introduced Below.

### Mrs. Irene Coffin

Mrs. Coffin, a Haligonian, has been newly appointed as lecturer in Romance languages at Dalhousie. She holds a Licencees es Lettres from Sorbonne University, France, specializing in French and Russian. Previous to her appointment, Mrs. Coffin taught at the Halifax Ladies College.

### Eric B. Davies

Eric B. Davies is welcomed to Dalhousie in his new appointment as lecturer in Mathematics. He holds a B.Sc. in chemical engineering from the University of Leeds. His hometown is Bolton, Lancashire, England, and previous to his new appointment he was lecturer, in chemical engineering at Harris College, Preston, England, and Scientific Officer for the United Kingdom. Mr. Davies is also an atomic energy authority.

### Irvine E. Millie

Irvine Millie, from Saint John, is a graduate of Mount Allison University '44 and Dalhousie University '48, with a Bachelor of Commerce degree. Following this he went to Queen's University where he took a Chartered accountants course of instruction and obtained his C.A.

### Arthur L. Neal

Mr. Neal, appointed as associate professor, received his BA at Cecilia and his B.Sc. from London. He lives in Halifax and is married, having two children. He is welcomed to the Institute of Public Affairs and has previously presented numerous official publications.

### Medicine

### DR. W. A. COCHRANE AND DR. KURT ATERMAN

Two appointments to the Department of Paediatrics of Dalhousie Medical School and the Children's Hospital were recently announced by President A. E. Kerr and Stanley

Lee, chairman of the Board of Directors of the hospital.

Dr. William A. Cochrane is full-time Associate Professor of Paediatrics and Associate Physician in the hospital. Dr. Kurt Aterman will be Associate Professor of Pathology and Director of the hospital laboratory.

Dr. Cochrane, a graduate of the University of Toronto in 1949, has done post-graduate work in Toronto, Cincinnati, London and Boston. He holds the certificate in Paediatrics of the American Board of Paediatrics and is a Fellow of the Royal College of Physicians and Surgeons of Canada.

Dr. Cochrane is the first full-time professor of Paediatrics at Dalhousie University. This position was established with the aid of a grant from the W. K. Kellogg Foundation.

Keenly interested in the research aspects of his specialty, Dr. Cochrane has done extensive work in the nutritional aspects of mental deficiency in infants and in childhood diabetes. He is also interested in the use of radioactive isotopes in the study of certain diseases of childhood.

Dr. Kurt Aterman has come to Halifax from England and is a graduate in Medicine both from Charles University, Prague, and Queen's University, Belfast, Northern Ireland. He has had extensive post-graduate study in Paediatrics and Pathology. He also spent two years at Harvard Medical School and the University of Chicago.

Dr. Aterman has had extensive experience with some 25 publications since 1950. He is already actively engaged in organizing a complete laboratory service for the Children's Hospital and also in assisting in the teaching and research programs of the Medical School.

### DR. CARL TUPPER

The appointment of Dr. Carl Tupper as professor of Obstetrics and Gynaecology at Dalhousie University and head of the Department of Gynaecology at the Victoria General Hospital has been announced by the president of the university, Dr. A. E. Kerr, and the chairman of the Board of Commissioners, Manuel I. Zive.

Dr. Tupper has been associate professor at Dalhousie since 1956. He is a Dalhousie graduate with the degrees of B.Sc. in 1933 and M.D., C.M. in 1943. He holds the specialist certificate of the Royal College of Physicians and Surgeons of Canada and is a Fellow of the American College of Obstetricians and Gynaecologists.

He served for three years as a captain in the Royal Canadian Army Medical Corps in Europe, and then returned to post-graduate study in Halifax and various American centers. He joined the staff of Dalhousie University and the Grace Maternity and Victoria General Hospitals in 1950.

Dr. Tupper has gained a reputation both as a specialist in Obstetrics and Gynaecology and as a medical teacher. In addition, for the past five years he has been the key figure in a co-operative research study involving several departments of the University, the Victoria General Hospital and the

Sept. 26

Up betimes. Didst early betake me to old haunts, to see how all had fared since my absence from the City.

Upon entering the great square, what was my horror to perceive that a number of Vendors had established themselves there, hawked their wares, and entreating every passer-by to make his mark. Close by did view the Government Exchange officers very busy carrying out pecuniary extortion upon the population, a sad sight. Quitted this scene to take a stroll in the country, but was stopped upon finding the Pleasance now destroyed. Where once there was naught, now are there mighty ruins. Whats Dunn cannot be undunn, but who could think a small silver spade would work such havoc?

Sept. 29

Did early notice great throngs in the City, who upon the toll of the great bell did disappear with much commotion. Much amused to observe a new fashion; many of the commoner sort were wearing stiff shirts, with a scant cut to the sleeve. In place of hats they wore small circular arrangements, of a vile cut and most bilious color.

Grace Maternity Hospital. He and his research associates have written a number of articles and reports which have attracted the attention of scientists and clinicians throughout Canada, and he has been invited to discuss his work at several important international conferences.

John Lloyd Edwards, a native of Wales, has been appointed to the Sir James Dunn, Bart and Chair in Law.

He received his LL.B. at the University of Wales in 1939. During World War II, he served in the British Army as an officer in the Royal Artillery.

In 1947 he was granted the Harnsworth Scholarship at Inns of Court, Middle Temple, and in 1948 became a member of the Bar. He was awarded the MacMahon Postgraduate Fellowship at Cambridge University where he received his Master's degree in criminal science in 1952. He received his doctorate at the University of London in 1953.

The plot, a fast-moving one evolves around the scenes of the California gold rush of 1853, and portrays all the gaudy, pathos, and explosiveness of just such a typical gold rush town as Rumson was. The name of the town came from the lead character, whose name is Ben Rumson. In the original cast his part was acted by well-known singer-actor James Barton. Others in the original cast included Tony Bavaar, who played the part of a Mexican, Julio, and Olga San Juan, playing the part of Ben's daughter, Jenny Rumson.

Activity and rehearsal commences in the Dalhousie Gymnasium about the first week of November, including orchestra rehearsal, solo and chorus singing, speaking parts and dancing. Len Chappell, last year's producer and director will be assisted again by C. L. Lambertson, who will direct the orchestra and chorus singing.

Such popular songs as, "I Call the Wind Maria" and "I Talk to the Trees" will be echoing from the gym. The male part of the chorus this year will play a prominent part, singing such songs as, "Open Up That Can of Beans." The stage manager of this year, under the direction of Forbes Langstroth, will be busy shortly creating the bright and elaborate scenes centering around the old mining town. We all look forward to further announcements of the progress of "Paint Your Wagon."

Dr. Edwards is the author of "Mens Rea in Statutory Offenses" which was published in 1955. He is now writing "The Law Officers of the Crown". He has the reputation of being one of the leading authorities on criminal law and criminology in the British Commonwealth.

Daniel M. Nunn

Daniel Merlin Nunn, B.A., B.Ed., LL.B., LL.M., has been appointed as Assistant Professor of Law at Dalhousie Law School.

Professor Nunn was awarded the Master of Laws degree with distinction by Harvard University in June of this year. He attended Harvard Law School as a post-graduate student in Corporation and Labour Law, having been granted a Ford Foundation Fellowship in 1957.

He was one of the top ranking students at Dalhousie Law School in recent years. He was a winner of the Nova Scotia Barristers' Society Scholarship and the F. L. Milner Prize. He received the degree of Bachelor of Arts from St. Francis Xavier University in 1950 and a Bachelor of Education from the same university in 1951. He is a son of Mr. and Mrs. C. Bruce Nunn of Sydney, Cape Breton.

Oct. 7

Arose late. Upon going through the city, much diverted to see great numbers, upon which each in turn deposited his chin. The attendant not markedly communicative but did surmise this to be an annual penance.

Pursued my accustomed way to the Coffee House. There did hear the great Alasandalack speak heatedly upon oratory; he is exhorting the rabble to arise and speak. Precious Duckling very busy gathering a new company of Players. It is rumored that there are to be many court revels this autumn. Over coffee vile did fall to meditating upon those who have passed and gone, never to be seen here again. Slaughter, Fustian, Hiccup and Hemp are no longer with us. Did drown my sorrows in a second cup... and so...

Did stroll across the dingy common, and did think to enter the

announcements of the progress of "Paint Your Wagon."

## DGDS Paints Your Wagon

The musical production, "PAINT YOUR WAGON", is coming to the Dal stage! Julia Gosling, President of the Dalhousie Glee and Dramatic Society, has released an announcement interesting to all avid solo singers, dancers, chorus singers, costume and make-up "experts" and, of course, to all prospective spectators.

This lively musical production is to be presented in the Dalhousie Auditorium, February 25, 26, 27 and 28, and is under the direction of Len Chappell and Professor C. L. Lambertson.

The huge success of last year's production has made necessary an extra night's performance. People were disappointed as being turned away last year. Of this year's production the president of DGDS says, "We expect an even better performance than last year's. Finian's Rainbow, which incidentally was Dal's most successful production since post-war Shakespeare plays."

"Paint Your Wagon" was written by Frederick Lerner and Allan Loewe, distinguished composers of Broadway hits, "My Fair Lady," "Brigadoon" and "Gigi."

Arts and Science—October 9—Resolved that the franchise should be extended to women in Canada.

Football—On Thursday, November 12, Dalhousie defeated St. F.X. by a score of 27-3. St. Francis won the honor of being the only team to score against Dalhousie this season. In an editorial in the same paper Dalhousie was criticized for playing too well, being too greedy and winning too long.

—Football has been kept up at Dal for well onto 30 years—perhaps more. The body of students was at first very small. Even now it comprises less than 300 males. Of these fully three-fourths never touch a football.

Delta Gamma's At Home—The corridors and Munroe Room were prettily decorated, and the draughting room offered the most enticing line of dainties ever. The lists of dances was a well-arranged one and with "McNally's" dispensing "Turkey in the Straw"—everyone wore a happy smile. Early in the evening a short program was given. The ever popular, Mrs. Kennedy-Campbell sang more Scotch songs as only that lady can, and Miss Helen Creighton delighted the audience with a well rendered violin solo. On the whole the evening's entertainment was one of the most successful in years.
