

Izaak Walton Killam

**Children's
Hospital**

A CAREER IN ORTHOPTICS/ OPHTHALMIC MEDICAL TECHNOLOGY

Orthoptics is the clinical science of ocular motility and binocular vision, and related disorders of the eye. An Orthoptist is an eye muscle specialist who works under the supervision of an ophthalmologist (eye physician and surgeon). An Ophthalmic Medical Technologist assists the ophthalmologist with a wide range of diagnostic tests and procedures - some requiring a great deal of technical expertise.

In July 1991, the Izaak Walton Killam Children's Hospital will commence an accredited twenty-four (24) month training program leading to a Certificate of Orthoptics and Ophthalmic Medical Technology.

Applications are now being accepted from individuals with a Baccalaureate degree with courses in any of the following areas: psychology, physiology, biology, anatomy, physics, statistics, research design. Work/volunteer experience in the health care field will be considered an asset. Candidates should possess good communication skills, sound judgement, emotional maturity and a demonstrated ability to relate well to small children and to adults.

Financial assistance may be available to qualified students.

Deadline for application is February 15, 1991.

For further information regarding a challenging, interesting and rewarding career in the health care field, please write: **Orthoptic Department**
