

## Sixth annual tour of town's loveliest gardens on Sunday

PORT CREDIT — Garden lovers will have the opportunity of seeing some of the loveliest gardens in Mississauga and Port Credit, this coming Sunday, when the Cloverleaf Garden Club presents its 6th annual Garden Tour.

President John Nunan and members of the club have arranged for the viewing of eight private gardens with the final stopping place, Sheridan Nurseries where refreshments will be served.

The tour commences at the home

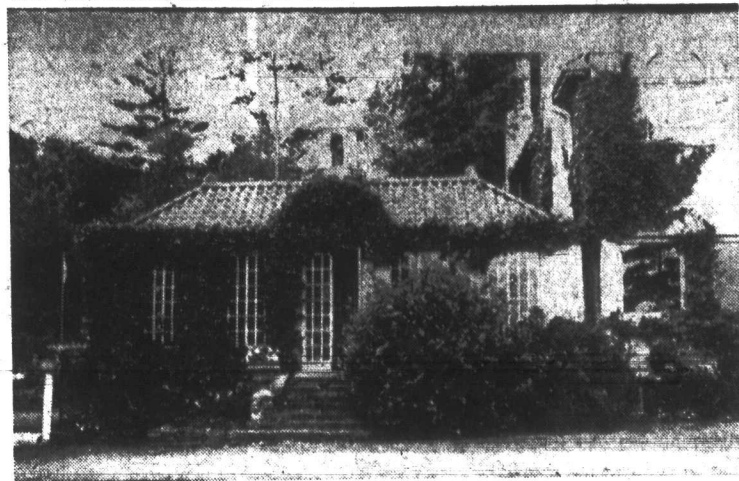

of Tom Crookston, 84 Mineola Rd. W., where maps of the tour will be given out. Starting time is 11 a.m. and the tour concludes at 4 p.m. There will be a nominal charge for adults, but children accompanying them will be admitted free.

New gardens on view this year are the Tony Adamson's and the Derry's on Adamson Lane, and the Chris Mentis' on Woodlawn.

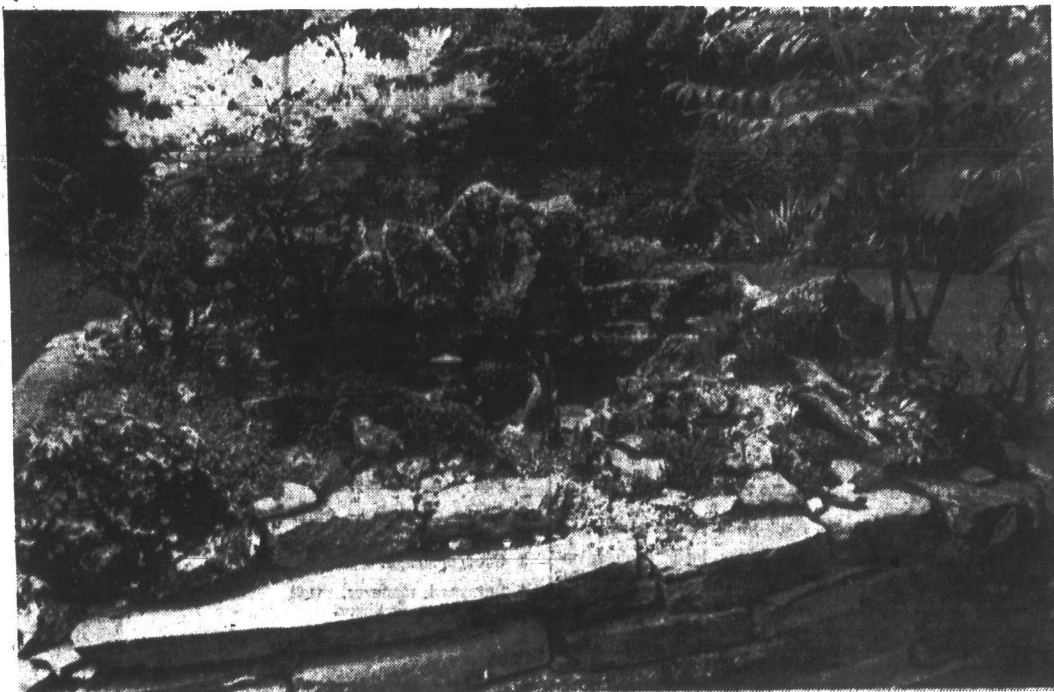

The club expects bus loads of garden lovers from Barrie, Owen Sound

## Life in the 1850's at Black Creek

TORONTO — Thinking of a new approach to spending a week day or weekend during the summer?

The Metropolitan Toronto and Region Conservation Authority suggests a visit to one of its 13 conservation areas in the region, or a trip to Black Creek Pioneer Village to see life as it was lived during the 1850s.

The largest and newest conservation area is the Claireville area near Malton. There is all kinds of space and all kinds of recreational opportunities in this 1,600-acre area located off Highway 7, just west of Highway 50. Claireville boasts a 120-acre man-made lake which is ideal for canoes, rowboats or sailboats

as well as swimming. There are also facilities for a pleasant picnic. The area, like the others, is open weekdays and weekends. Black Creek Pioneer Village, located at Jane Street and Steeles Avenue, represents a showcase of pre-Confederation Canadiana. It comprises more than 20 restored buildings including a mill, town hall and general store. Visitors may enjoy a snack or meal in the pioneer tradition at the Half Way House restaurant. Further information on these points of interest and others administered by the Authority may be obtained by contacting the Authority offices at 889-5425.

## Summer camp vacancies at Albion Hills area

TORONTO — The Metropolitan Toronto and Region Conservation Authority announces that a few vacancies still exist in its summer camp program at the Albion Hills conservation area and field centre. Parents who have made no plans for their children this summer may be interested in enrolling them in this program which combines outdoor conservation education and recreation.

The program is open to youngsters who have completed grades 7, 8, 9 or 10 during their school year. The following periods are open to boys: Five-day period — Aug. 17-21; 12-day period — Aug. 17-28. For girls: Five-day period — Aug. 3-7; 12-day period — Aug. 3-14. Cost of the five-day program is \$45; and the 12-day period is \$108, per person.

The beautiful Albion Hills area, comprising 1,000 acres, is located on Highway 50, about five miles north of the village of Bolton.

A total of 40 children can be accommodated in each period, and applications will

be treated on a first-come, first-served basis. The programs consist of direct-contact education on such topics as water conservation, fish and wildlife, plant life, weather and farming. Recreational pursuits including swimming, fishing, riflery, archery, hiking, camp fires, cookouts, astronomy, photography, camping out, compass and orienteering.

Further information and application forms may be obtained by writing to the Authority offices c/o PO Box 720, Woodbridge, or telephoning: 889-5425.

## Craftsmen courses offered at Sheridan Design School

PORT CREDIT — At the Sheridan School of Design, 1460 South Sheridan Way, will be residential summer courses for craftsmen from July 12-24. Fifty craftsmen from 21 Ontario communities and New York State have enrolled for the summer courses, given in co-operation with the Continuing Education Division at Sheridan College and the Ontario Craft Foundation.

Classes in Ceramics-Forming (Raku) will run July 12-17 with a continued session July 19-24. Glass courses will run the same two weeks. Ceramics Technology (glaze) and metal, will be given only from July 19-24. Fees for each course are

\$100 which includes room, board, basic materials and tuition. Summer school staff include: Finn Lynggaard, an established potter — author from Denmark, will instruct Ceramics-Technology and Ceramics-Forming. In September, 1969, he organized an exhibition of Raku, at Den Permanente, Copenhagen, as a finale to his book on "Raku" (published spring '70).

Roger Lang, a young American Glass-Ceramics craftsman and currently Ceramics Department Head at the Cleveland Institute of Arts, will teach Ceramics-Forming (continued and optional). Mr. Lang received his M.F.A. degree at the University of Wisconsin.

Glass instructor will be Robert D. Held, B.A., M.F.A., who is a member of the School of Design faculty. Mr. Held studied glass at Penland in 1968 and has worked on a two-year tour from the Second Glass National Exhibition at Toledo. He has exhibited at the CNE and his glass won a Craft Dimensions Exhibition Award in 1969.

William Ottemiller, B.F.A., M.F.A., and also a faculty member at the School of Design, will teach Metal (advanced and jewelry work). He is a graduate of the School for American Craftsmen and has held teaching posts at the School for American Craftsmen and the University of Alaska.

## Federal loan for sewers announced

MISSISSAUGA — A \$350,000 federal government loan has been authorized for the construction of 10,500 linear feet of 48-inch diameter sanitary sewer here, a spokesman from the office of South Peel MP Hy Chappell told the Times Monday.

The loan will go to the South Peel Sewage Works System and is provided for under the National Housing Act.

Robert Andras, the federal minister responsible for housing, is expected to make the announcement today (Wednesday), the spokesman said.

## Port Credit pollution checks on Lakeshore Rd.

PORT CREDIT — A mobile testing unit from the Automotive Emission Control Section of the provincial Air Management Branch will examine late model cars here this week to make certain they are equipped with proper pollution control devices.

The unit was set up Monday in the municipal parking lot at the corner of Lakeshore Road and Front St. It will check 1969 and 1970 model cars.

"It is now an offense not to have these devices on new cars," Douglas Lintula, Information Officer with the Department of Energy and Resources told the Times Monday. "All drivers are obliged to stop and take the check if they are asked."

The unit is being operated by Don Nix, a department official and Port Credit police sergeant Don Thompson.

## Ontario incomes have doubled in 12 years. That's something your children can build on.

Ontario youngsters can look forward to the future with more confidence than almost anyone. They'll inherit an economic giant with a remarkable record of accomplishment. Few places in the world, for example, can equal our record for rising incomes. Our pay envelopes are twice what they were in 1957, yet prices have gone up just 33%.

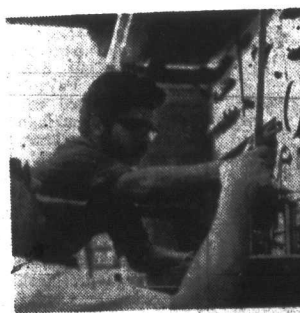

Ontarians earn more, perhaps, because we produce more. Our Gross Provincial Product (the dollar value of all the goods and services

produced) has doubled in the last decade. By 1969 it had reached \$32.3 billion and projections show we could reach \$52 billion by 1975. Today we account for more than half of Canada's manufactured goods and 80% of Canada's fully manufactured exports. Nice work!

Because of the way we work, Ontario is in good shape to face the future. We have an economy our children, and their children can build on... an economy that can continue to provide the 100,000 new

jobs we need each year to accommodate our growing labour force. Though, our dollar and our economy face many challenges these days, Ontario has built the foundation to meet them. But, it's not our style to stand on our record. We must keep growing and keep building our economy.

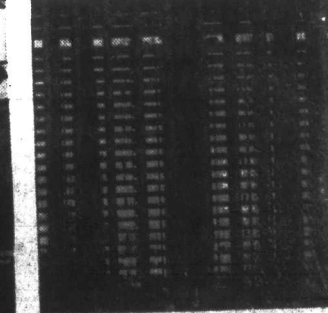

*One way you can help—put your money where your job is—when price and quality compare, shop Canadian.*

Ontario's educational system is growing to provide the skills and knowledge that are vital to a growing economy. The Province today has 16 universities with a student population that has doubled in the last four years. And we've created 20 community colleges in three years to give Ontarians the widest educational opportunities.

Our growing economy places growing demands on electrical power. Nuclear generating stations, like the one above under construction near Pickering, will help supply keep pace with demand. This station will be one of the largest in the world.

Wages aren't all that have been going up in Ontario. There's been a lot rising in steel and concrete to house our expanding population and industry. Last year over one-third of all the money invested in construction in Canada was invested in Ontario.

Canada's life style of tomorrow presents many challenges. But it's Ontario's style to meet these challenges today.
