"In this book a party sent out by the Hudson's Bay Company, build a fort upon what they believed to be an island, but upon discovering, after a while, that the ice has totally changed its place of rising, they find that they are really upon a drifting ice-ice and this gradually dwindles in size, frightening the voyagers, and bringing into play all their energies and all their ingenuity. This book is, without question, the most readable wonder story in modern literature."—*Heart and Home*.
