attler in North St. of water in the did not reach the bet. (n) 371 I was in the t, and saw the ice n sately say that Stone Fort, except ar Point. I have ars, and can state ring that time the at the Stone Fort, I ever heard that (p) This may be 3rd. From repeated observations at different times during high during ordinary water, and the breaking up of the ice in spring a person on foot at a smart walk can keep abreast of an object floating down stream, and I don't think the current, at the Stone Fort, can exceed four or at most five miles an hour. (p)
