CRAMPEY & KELLY Toronto, Ont.

Ottawa, Aug. 15-30 boxes of white and 22 boxes of colored cheese offered and sold at 12 1/2c and 12 1/2c respectively. Cornwall, Aug. 15-1639 cheese boarded, of which were colored and 25 white. OUR FARMERS' CLUB Correspondence Invited

PRINCE EDWARD ISLAND.

LOWER MONTAQUE, Aug. 10- We are having very fine hay-making weather. Hay is turning out fine and is good crop. Grain is doing fine. We are having a heavy crop. All weather. Corn will be a heavy crop. The pastures are doing fairly well. The pastures are holding out well and cattle are in good shape. There will be a good crop of grass this year on account of the clear, first crop in our country for four years- G. A.

QUEBEC. COMPTON CO. QUE.

COMPTON, Aug. 12- We are having rather unsettled weather, which makes doing haying about half of the farmers here. Hay is doing fine. We are fairly good crop. Grain is looking fine. We are most of the places that are not so speak of except in places that are suffering from the late frost last spring. New potatoes are being set. 30c to 35c; butter, 24c to 25c; eggs, 25c to 30c. G. G. C.

ONTARIO. NIPISSING CO. ONT.

COCHRANE, Aug. 12- July 30 I visited New Lakeside. I found hay being harvested. I saw a young two tons and two to the acre A. I thought. My own roots looked fine. Potatoes and other crops are doing well. From Cochrane, mental Park all crops were in good condition. At Cochrane, Ont. which is rather hay, poor yield, about one ton to the acre. Potatoes are not up to last year's crop, and where planted near the bush have suffered severely from sharp frost on night of 6th. From Cochrane as far south as Lakeside, this frozen condition of potatoes, due to protraction of potatoes, are doing well and have not even been touched by the frost. There is larger clearance I believe there is a large clearance in the north country. At the present time for the north prevalence of pests from time to time is most distressing for the settler, but as land opens up this drawback will be in a great measure disappear. E. E. S.

WELLINGTON, ONT. GOODFELL, Aug. 12- We had a good yield of hay in the field. The yield did good after three weeks of drought. Fall grain and barley have been harvested and are rather slow in the straw. The peas are grown here, but the crop is rather short in the straw. The root crop has been at a standstill for some time, but is improving since the rain. Corn is a promising crop, and a large acreage has been planted. C. S. N.

WILBER PROUSE'S IMPORTATIONS

Wilber C. Prouse, Tillsonburg, Ont., writes that he has just received a purebred Holstein heifer which he bought at Crumpton's dispersion sale while on his trip through the Eastern States last spring. Thinking it may be of some interest to Farm and Dairy, he gives us the following information concerning the breeding of the four animals imported by him: The above mentioned is King Pontiac Sire Clothilde sire, the dam's grand-sire is A.R.O. daughters, 23 A.R.O. sons. He sire of 13 weeks a champion sire, including Spring Farm Pontiac Lass, who made the 4215 lbs. gain in 7 days, 173.5 lbs. in 30 days. Her dam has five sire Johanna De Kol 2nd's Lad, who has 37 A.R.O. daughters, including Jags of Sarcasitic with a butter record of 35.35 lbs in 7 days, 134.96 lbs. in 30 days. Johanna De Kol 2nd's Lad was grand champion at St. Louis, and has 30 A.R.O. daughters and 29 A.R.O. sons.

The herd headed selected by Mr. Prouse is Finestra Valdey, Grady Fayne, bred by Bernard Meyers, Finestra, New York. This young bull has a combination of breeding seldom equaled. His sire is from a former champion, two-year-old, who was bred from Valdey's Sarcasitic, and who is the first cow in the world to produce 40 lbs. of butter in 7 days. In his extended pedigree he has less than three cows that have broken world's records. Valdey's 2nd, 2nd, 41.98 lbs. butter from 64 lbs. milk in 7 days. Blood-medic Hengerveld Aggie, who made at one year and three months 100.00 lbs. butter from 48.7 lbs. milk in 7 days and 89.19 lbs. butter from 1.676 lbs. of milk in 30 days.
