Germans are Suffering at the Hands of the British Air Forces; Tremendous Material Losses Inflicted.

With the British Army in France, August 14th.—In addition to a continuous harrassing fire from the artillery, the Germans are suffering at the hands of the British air forces. Tons of bombs are being dropped on them day and night and transports in towns and villages behind the line have been hit. Bridges across the Somme at Peronne and elsewhere have been bombed heavily.

Prisoners captured are unanimous concerning the effectiveness of the low flying British airplanes. They say the airmen have caused tremendous material losses and frequently have blocked roads completely by direct hits. They also have done heavy execution by pouring streams of machine gun bullets into enemy masses at close range.

All the prisoners mention the work of the tanks and seem to have stamped on their minds visions of steel monsters spitting death. One German company commander concluded his remarks about the tanks by saying: "They are a magnificent weapon and I can't understand why we have none to speak of."

A German aviator shot down within the British lines declared he was positive that the German aerial losses in recent weeks had been much greater than is admitted officially. He said he knew of one instance where five German two seaters crashed to earth well inside the German lines, but he added there was no mention of them in official reports.
