## Sheriff's Sale.

COUNTY OF QUEENS.

There will be sold at the front of the  
Office of the Registrar of Deeds and Wills  
in the Parish of Gagetown, in the County  
of Queens on Saturday, the Twenty-  
Fourth day of September A. D. 1898  
at the hour of twelve o'clock, noon.

All the right title interest claim or  
demand of Benjamin Clark in to or out of  
all that certain piece or parcel of land and  
premises described as all that certain tract  
piece or parcel of land situate lying and  
being in the Parish of Chipman in the  
County of Queens and Province of New  
Brunswick and Dominion of Canada and  
situated on the Eastern bank of the Gas-  
pereux and bounded as follows to wit:  
Beginning one chain south from a Birch  
tree standing on the Eastern side of the  
Gaspereux River at the southwestern  
angle of Lot number twenty-one granted  
to William Henderson thence running by  
the margin of the year one thousand eight  
hundred and forty four south eighty-seven  
degrees and thirty minutes east Thirty-  
two chains to a post thence south two de-  
grees and thirty minutes west Twenty  
Five chains to another post thence north  
eighty-seven degrees and thirty minutes  
west fifty chains to the southeastern bank  
or shore of the above mentioned river  
thence following the various courses  
thereof up stream in a northerly direction  
to the place of beginning containing  
ninety-five acres more or less and distin-  
guished as Lot Number Twenty in Block  
seventy four being the lot of land occupied  
by the said Benjamin Clark until a few  
years ago. Together with the buildings  
and improvements thereon and the appar-  
tenances to the same belonging. The said  
lot having been seized and taken under  
and by virtue of a Writ of Execution issued  
out of the Queens County Court against  
the said Benjamin Clark at the suit of  
Robert D. Richardson.  
Dated at Gagetown in the County of  
Queens this twentieth of June, A. D.  
1898.

**JAMES REID,  
Sheriff of Queens County.**

## Isn't it Time

Matches**

## Farm and Household.

Cow Peas at the North.

Owing to the fact that clover is fre-  
quently damaged by freezing in winter  
and drought in summer, there is some  
inquiry for another leguminous crop which  
is not open to these objections. With  
our present knowledge, no substitute for  
Indiana can be offered that is equal to  
the common red or large English clover,  
both of which are thoroughly acclimated  
and flourish throughout the state.

Notwithstanding this fact, the cow pea  
has some points of advantage, among  
which are: (1) greater capacity to en-  
dure drought, (2) ability to grow on soils  
too thin to nourish clover, (3) ability to  
produce a large amount of forage or green  
manure in a few months of warm weather  
and thus avoid the frosts of winter and  
early spring.

Cow peas are highly esteemed for for-  
age in many parts of the South. They  
are pastured, cut green, and fed as a soil-  
ing crop, and also cured as hay. Where  
they seed well they furnish an excellent  
pasture for pigs, in which case the land is  
left in fine condition for subsequent  
crops. In this state only the earliest  
sorts would produce much seed. In the  
richer soils the tendency would be to run  
to vines. Cow peas produce a very wat-  
ery growth, and are therefore not easy to  
cure for hay, although they have the ad-  
vantage of maturing in the dry season of  
the year.

But tops and roots are valuable to fer-  
tilize the soil. Cow peas have, like clo-  
ver, a very beneficial, mellowing effect on  
the soils in which they grow, and which  
traced under they quickly replenish the  
store of human and available nitrogen.  
It will doubtless be best to turn the crop  
under before the autumn frosts. If corn  
is to be grown the following spring, it  
will be well to sow rye soon after turning  
under the pea vines, to prevent, silks,  
washing of the soil and dissipation of the  
nitrogen stored in the vines.—[Bulletin  
Purdue University (Ind.) Experiment  
Station.

## Children and Poisonous Flowers.

Buttercups and daisies are generally  
associated in one's mind with Word-  
worth, children and Arcadian simplicity.  
It is difficult to conceive of anything hurt-  
ful or dangerous in connection with the  
pretty little yellow flower, but unfortu-  
nately it is not always the most modest  
and retiring plants or flowers that are the  
least harmful to the eye, the deadly  
nightshade (*Atropa belladonna*). Yet  
that the buttercup can vie with the dead-  
ly nightshade in poisonous qualities, and  
still when consumed in sufficient quanti-  
ties it will cause death. A proof of this  
has lately been afforded in England, in  
the case of a boy who after eat-  
ing some buttercups died in a few  
hours with all the symptoms of irritant  
poisoning.

The buttercup belongs to the ranunculac-  
eae and nearly all the members of this  
group possess poisonous qualities, chiefly  
of an irritant nature, as deadly nightshade,  
laburnum and yew. Fortunately, butter-  
cups though nice to look at, do not as a  
rule tempt children to eat them whole  
sale, otherwise the mortality from this  
cause would be much greater than it is at  
present.

A German authority states that the  
roots and stubble of a good crop of red  
clover weighs over three tons per acre,  
and contain a hundred and eighty pounds  
of nitrogen, seven pounds of potash, all  
of which is placed, when turned under,  
in the most available form for growing  
crops. Clover makes a good demand  
upon the soil for potash and phosphoric  
acid. If the resulting crops are removed  
from the soil it will be easy seen how  
clover may rob the soil, as well as restor-  
ing fertility if the substances taken out  
are not restored.

If we cut our grass before seed forma-  
tion, or when just starting, our plant is  
in its fullest vigor. Elaboration and  
transformation of material is rapid. All  
substances are in a soluble, hence diges-  
tible condition. Drying or curing the  
plants does not make grass less valuable.  
Experiments at the Pennsylvania and  
Wisconsin experimentations indicate that  
there was a slight balance in favor of  
dried grass over green grass when fed to  
a milk cow; thus, if we cut it while in a  
condition to make the best pasture, we  
will have the best hay.

## Pungent Paragraphs.

The wheels in a man's head are seldom  
able to score a century run.  
Women never criticise the grammar of  
men who pay them compliments.  
A man is more apt to tell what he  
doesn't believe than what he does.  
When it comes to a toss-up, between a  
man and a bull the man invariably loses.  
True love is portrayed by a man and a  
woman who have been married three  
years and still ride a tandem.  
Art may be "long" but time is too short  
for people to become artists.  
About the time a man gets a large  
family of married daughters off his hands  
he has to begin setting sons-in-laws on  
their feet.  
I have learned a new distinction be-  
tween pessimist and optimist.  
"What is it?"  
"A pessimist always calls cream 'milk'  
and an optimist always calls milk 'cream.'"

## Humorous.

A Great Idea.

Mr. Frank Drew, the elder, told a good  
story recently that was illustrative of the  
gullibility of some samples of the rural  
mind. Mr. Drew was detained some  
time ago at a country railway station.  
While there he fell into conversation with  
a couple of idlers—the sort that usually  
hang around that centre of excitement, a  
rural depot.

Mr. Drew sized them up immediately.  
He drew nearer.

"It's a pity," he reflectively said, "that  
so much money is wasted in building  
railroads."

"That's so," agreed one of the natives.

"I've got a scheme," said Mr. Drew  
dramatically, "for cheapening the cost of  
them by at least 50 per cent."

"How's that?" quoth the native.

"Of course I'm not peddling this idea  
around," said Mr. Drew mysteriously.

"Of course not," said the native.

"I don't want it to get out before I get  
my patent papers."

"To be sure," said the native.

"This is the scheme," said Mr. Drew.  
"I would have just a short length of track  
material put together, and it would run  
under and over the train like an endless  
chain. When the locomotive ran on to  
the rail in front, the last car would be  
picking up rails at the rear and passing  
them along over the roofs of the cars  
back to the engine again. You see? The  
train would be really laying its own  
track."

"By gum," said the native, "that's im-  
mense!"

"It strikes me so," said Mr. Drew  
modestly. "It certainly has a good many  
advantages. It is a great thing to have a  
train that will go anywhere you want to  
go."

"That's so," said the native.

There was a short silence. It was  
broken by the other native.

"Say," he said, "what you goin' to do  
when you come to a river?"

Mr. Drew was prepared.

"That's simple," he promptly answer-  
ed. "We use ties, of course, in our en-  
dless track. Those ties will be made of  
rubber material and each one will be in-  
flated. They will sustain 17,000 times  
their own weight and you can't sink 'em."  
The natives looked at Mr. Drew with  
awe.

"Gosh!" they said, "you've got a good  
thing!"

## Just the Tune.

"I took out a living picture show  
once," said the theatrical manager, "and  
I had several queer experiences."

"We always had trouble getting suit-  
able music for one thing. I remember  
that we struck a certain town where  
music was furnished by a seedy, freckled  
young man, who officiated at one of  
those bangs-by-bang pianos. I asked him  
if he could think of music suitable to each  
picture as it was displayed.

"O, yes," certainly he could, "and do  
it impromptu."

The performance opened. He was  
seated at the piano, and he turned to  
look at the first picture. It was "Adam  
and Eve in the Garden of Eden."

"He didn't hesitate an instant. Like  
a flash he turned and began pounding  
out, "There's Only One Girl in This  
World for Me."

Lord Russell, of Killowen, years before  
he took sick, was sitting in court when  
another barrister, leaning across the ben-  
ches during the hearing of a trial for bigamy,  
whispered:

"Russell, what's the extreme penalty  
for bigamy?"

"Two mothers-in-law," replied Russell,  
promptly.

Skullins (he road agent)—"Lady, I  
stand in great need ur sympathy."

"Lady—" "Indeed!"

Skullins—"Yes, lady, I'm one uv de  
unfortunate crew uv a Spanish merchant-  
ship de United States captured."

Lady—"Poor man! and so you are  
looking for work?"

Skullins—"No, lady; food an' money  
is all I require."—Judge.

A juror having applied to the judge to  
be excused from serving on account of  
drowsiness, the judge said:

"Can you hear my charge to the jury,  
sir?"

"Yes, I heard your honor's charge,"  
said the juror, "but I couldn't make any  
sense out of it."

He was excused.

The Sweet Young Thing—Oh, did you  
read about that woman who refused to be  
rescued by the fireman until her dog had  
been saved?

The Savage Bachelor—Yes; I want to  
say that the devotion of the woman to the  
dog is one of the most beautiful traits the  
creature has.

"Do you think their engagement really  
means anything?"

"She says it means more tandem rides  
and ice cream than the last one she man-  
aged or it will be broken off."
