## Here and There.

**RD OF TRADE EXAMINA-**  
—Mr. John Cook, of this city,  
warded an only mate's certifi-  
competency on Saturday, 5th

**ORTED MISSING.**—Private  
Howe, a Newfoundlander with  
Canadian Contingent, has recent-  
ly reported as missing. Private  
is a native of Cupids, and is a  
Mr. George Rowe and Mrs.  
Howe of that place. The young  
parents will have the sym-  
of the community in their an-  
and it is hoped that good news  
on be forthcoming.

**KITCHIN, P.P. PREACHES.**—  
Joseph's Church, yesterday,  
the Pastor, Rev. Dr. Kitchin  
and on the Gospel of the day,  
which he made eloquent and  
reference to the cruel war  
aging throughout Europe, and  
ed his congregation to pray  
and frequently for our sol-  
s who had offered their ser-  
for their Empire and country.  
discourse of the rev. gentleman  
sisted to with rapid attention  
was inspiring to all.

Yarmouth Y. M. C. A. Boys'  
held at Tusket Falls in An-  
found MINARD'S LINIMENT  
beneficial for sun burn, an im-  
relief for colic and toothache.  
ALFRED STOKES,  
General Secretary.

**CATHEDRAL.**—At the R. C.  
ral yesterday, instead of the  
procession in the Church  
there was Exposition of the  
Sacrament from noon until  
vespers, when a procession took  
through the Church. During  
afternoon the Cathedral was  
ed with devout worshippers.  
Vespers the congregation was  
one. Benediction was impart-  
Rev. J. J. McDermott, the Ad-  
rator of the Archdiocese.

**MUTUAL GIRL AT THE NICK-**  
EL TO-DAY.  
patrons are looking forward  
ay's programme as it includes  
episode of "Our Mutual"  
The heroic Margaret visits a  
teller who tells her strange  
and she has a thrilling experi-  
"Ethel Has a Steady" is a com-  
which is featured Fay Titcher  
amous comedienne. "The  
is a two-part social drama  
of the best ever given here.  
ved the Ladies" is a sweet love  
by the Selig players. Everyone  
to this. Then there is a Key-  
comedy. A very laughable one.  
lay the third episode of the  
Dollar Mystery will be shown.

(Wholesale only.)

### THIRTY-FIVE AERIAL BATTLES OCCURRED DURING LAST MONTH.

London, June 2.—The log of the British flying corps for the past month, shows that there have been no less than thirty-five battles in the air, in all of which victory is claimed for the British airmen.  
Two encounters with Zeppelins are included in the list.

### TO ASSIST ADULT BLIND.—Lady Davidson, Lady Morris, Lady Bowring, Mrs. M. G. Winter, Mrs. Daley and a number of other ladies have arranged for a meeting of the ladies of St. John's to hold a meeting in the Grenfell Hall, to-morrow evening to devise means of assisting the Adult Blind: A large audience is solicited.

## Respirators are Not a Success.

Fall to Save the Men in Trenches From Gas Poisoning.

Toronto, June 1.—That the respirators, or "muzzles," as the British "Tommyes" call them, fail to save the men in the trenches from gas poisoning is the assertion of a non-commissioned officer in the British army, who writes to his uncle, Rev. A. Logan Geggie, of Toronto. He says: "The wind being favorable, and the gallant Wurtembergers being in a domestic frame of mind, they turned the gas on." All donned the "efficacious antidote" (a chemically treated pad of cotton wool four inches square). Eyes began to water and smart uncomfortably, and the fog rolled on. In case my writing is not sufficiently descriptive, just ask your wife to throw a handful of chloride of lime in your face. That should give you a fair idea of the preliminary stages of the gas trouble. And the fog rolled on. Breathing became difficult. Bloodshot eyes shot rapid, pathetic questions, and toil with splendid zest, to trim the whiskers from the lawn, and keep the weeds suppressed. They pull up thistles by the roots, and swat all noxious weeds, and softly say, "We'll bet our boots these things won't scatter seeds." They to their homes devote their lives; they strive to keep things neat; they know the lawn, where blue grass thrives, for beauty can't be beat. The tenth man doesn't care a whoop how shabby things appear; the weeds are growing round his coop in regiments, each year. The grass is smothered by the weeds, which swipe each inch of soil, and every zephyr blows the seeds, to queer the good men's toil. There is no law to make him eat his weeds, or mow them down, although his place will queer the street, and handicap the town. Why doesn't congress up and knock this Jonah on the pate? For nearly every village block has got this sort of skate.

### THE UNDESIRABLE CITIZEN.

WALT MASON

Nine men get up at break of dawn, and toil with splendid zest, to trim the whiskers from the lawn, and keep the weeds suppressed. They pull up thistles by the roots, and swat all noxious weeds, and softly say, "We'll bet our boots these things won't scatter seeds." They to their homes devote their lives; they strive to keep things neat; they know the lawn, where blue grass thrives, for beauty can't be beat. The tenth man doesn't care a whoop how shabby things appear; the weeds are growing round his coop in regiments, each year. The grass is smothered by the weeds, which swipe each inch of soil, and every zephyr blows the seeds, to queer the good men's toil. There is no law to make him eat his weeds, or mow them down, although his place will queer the street, and handicap the town. Why doesn't congress up and knock this Jonah on the pate? For nearly every village block has got this sort of skate.

## Teachers' Salaries.

Editor Evening Telegram.

Dear Sir,—Pardon me for taking up your valuable columns to back up Dives Letter which appeared in the Daily News of the 27th inst. I have been a teacher of A. A. standing and taught school for several years but was obliged to quit on account of not getting enough to live. To become proficient in the art of teaching the School Boards will send a boy to a Training School in St. John's. On those pupil teachers the country is spending thousands of dollars annually to train them. What returns do they give the country for the money spent on them? After a couple of years teaching they resign to go at something else. We cannot blame those energetic young men for with all their education they are expected to work for less than the common laborer receives. What is offered them when they leave College with an A. A. or First Grade? The Chairman of the School Board will offer him one hundred and fifty dollars from the School Board plus his Augmentation. After reaching the A. A. Augmentation Standard his salary for the money spent on them is generally ended. The Board may increase his salary to Two hundred and fifty dollars but in the majority of cases that is the limit. Even two hundred and fifty dollars in many of the charming eyes is very large. If they have nothing else to do with the money they will build schools in holerling distances of another so as not to increase the Teachers' Salaries. I have seen the advertisements in the Daily News of which Dives speaks. In those times when the cost of living is so high I must say any Chairman who would offer any male teacher such a small sum must have great courage. The teacher accepting will certainly never die of indigestion. If there were anything in the teaching profession there would not be any necessity of putting an "ad" in any paper. If there be a job vacant in any other branch of the Government you will not see an "ad" in the paper. No, but instead there are generally about fifty applicants. The members of the district in which the vacancy occurs are interviewed by the biggest influence in the district and after seven or eight Executive meetings this appointment is made—the heeler with the biggest pull gets the job. Not so in the teaching profession on account of starvation salaries. The only man that ever did anything for education in this country as far as teachers are concerned was ex-Premier Bond. He increased the Education Grant so that the Augmentation Grant was increased 50 per cent. He also increased the grants to the Boards so that out of \$60,000 increase to the Education Grant every teacher got at least from fifty to one hundred dollars increase. What has Premier Morris done for Education? I say nothing but cod the teachers. Whenever he speaks of education in the House he boasts he has increased the Education Grant \$100,000. Where has the money gone? In whose pockets has it gone? Not, I am sorry to say, in the pockets of the teachers but increasing the College Grants of St. John's and increasing the Inspectors salaries. Out of the \$100,000 increase the A. A. and 1st Grade Teachers got the paltry increase of thirty dollars; the 2nd Grade, twenty, and 3rd Grade ten. Is not this a creditable showing for the colder Morris. Let us compare Bond's increases with Morris' Bond could give nearly a hundred increase out of \$60,000 to every teacher. Morris could only give thirty dollars to the highest grade teacher out of \$100,000. In the allocating of the increase the four great educational authorities—the Inspectors—gave thirty dollars to both A. A. and 1st Grade. What authority had those leasured gentlemen to put an A. A. on the same list as 1st Grade. It requires much more study and time to get an A. A. than to get an A. A. Grade is recognized as the highest grade in the Education Act. Why then give an A. A. only the same increase as a 1st Grade. Just only another example of the levelling and down grade system the Morris Government has established.

Let the Government get a move on it it intends to keep experienced teachers in the profession. Give the teacher a living wage. Let the Government pay according to years of experience so that a teacher going on yesterday will not receive as much as a teacher of twenty years experience. Increase the Augmentation Grant so that young teachers will have something to look ahead to. Give an A. A. of over twenty years standing three hundred dollars; 1st Grade two hundred dollars; and 3rd Grade one hundred and fifty dollars. 'Twould only take an increase of about thirty thousand dollars. Morris gives twice as much as this to the front rank of heeler to keep them in tune for the next elections. Make the teachers contented with their work and then we shall see education flourishing.

I am, yours, truly,  
EX-TEACHER.  
Conception Bay, May 29th, 1915.

## The Loss of the Vosges.

**AN ORCADIAN ON BOARD.**  
The Submarine Attack — A Two Hours' Chase — Interesting Interview.

An interesting account of the sinking of the Moss Line steamship Vosges by a German submarine off Trevo Head on 20th ult., was given by Mr. James Stewart to a "Glasgow Evening News" representative. Mr. Stewart who is a marine engineer, came across the Atlantic on the Barington Tweedmouth from Baltimore to Bordeaux. He left the steamer at the later port, and was travelling as a passenger on board the Vosges which sailed for Liverpool, on 18th March.

All went well, said Mr. Stewart, until shortly after ten o'clock on Saturday morning when a submarine was sighted on the port side. The craft would then be about 300 yards from them. She was flying the German ensign, and had up the A B signal for them to abandon the ship. Captain Green, however, paid no attention to the signal. He gave orders that all steam was to be put on, and kept the head of the ship out to sea as there was a good swell at the time. This manoeuvre put the submarine to some disadvantage as the seas were breaking over her, and by this move Captain Green succeeded in depriving the enemy of the use of his torpedoes.

A Stern Chase.  
It was a stern chase, but within half-an-hour the submarine had got into position and first of all fired a blank shot. As no heed was paid to it the shells soon came along. The captain, however, continued to handle his ship in such a fashion that it was only at intervals that the enemy could bring his guns to bear, but when he did his fire was deadly. The first shot hit the steamer on the port quarter and made a big hole in her side. Twenty minutes later the chief engineer came up and told him (Mr. Stewart) that he had all the steam he could give the vessel, but he was afraid they would not get away. Shortly afterwards another shell came through the side of the ship and killed the chief engineer who at the time was standing at the stokehold door.

A Score of Shells Fired.  
For fully two hours, continued Mr. Stewart, the Vosges kept in front of the submarine. In all about a score of shells were fired, and nearly half of them hit the ship. The effect was terrible. One shot carried away the aft rigging, another wrecked the rooms of the four engineers, while the one which really sunk the steamer struck her below the water-line, almost under the bridge. The bridge itself came in for a good deal of attention, and suffered accordingly. All four officers who were on it being more or less injured; while the last shell fired carried away the funnel.

## THE LION

is recognized as the King of Beasts, SUNLIGHT SOAP is recognized as the King of Laundry Soaps. The rule of the Lion extends only over the animal world; the rule of SUNLIGHT SOAP extends to wherever Soap is necessary. It is without a rival for washing clothes, household linen and all fabrics even of the finest texture. It is the best Soap that skill and money can produce. Give it a trial and you will be convinced of its value.

## The Loss of the Vosges.

AN ORCADIAN ON BOARD.

The Submarine Attack — A Two Hours' Chase — Interesting Interview.

An interesting account of the sinking of the Moss Line steamship Vosges by a German submarine off Trevo Head on 20th ult., was given by Mr. James Stewart to a "Glasgow Evening News" representative. Mr. Stewart who is a marine engineer, came across the Atlantic on the Barington Tweedmouth from Baltimore to Bordeaux. He left the steamer at the later port, and was travelling as a passenger on board the Vosges which sailed for Liverpool, on 18th March.

All went well, said Mr. Stewart, until shortly after ten o'clock on Saturday morning when a submarine was sighted on the port side. The craft would then be about 300 yards from them. She was flying the German ensign, and had up the A B signal for them to abandon the ship. Captain Green, however, paid no attention to the signal. He gave orders that all steam was to be put on, and kept the head of the ship out to sea as there was a good swell at the time. This manoeuvre put the submarine to some disadvantage as the seas were breaking over her, and by this move Captain Green succeeded in depriving the enemy of the use of his torpedoes.

A Stern Chase.  
It was a stern chase, but within half-an-hour the submarine had got into position and first of all fired a blank shot. As no heed was paid to it the shells soon came along. The captain, however, continued to handle his ship in such a fashion that it was only at intervals that the enemy could bring his guns to bear, but when he did his fire was deadly. The first shot hit the steamer on the port quarter and made a big hole in her side. Twenty minutes later the chief engineer came up and told him (Mr. Stewart) that he had all the steam he could give the vessel, but he was afraid they would not get away. Shortly afterwards another shell came through the side of the ship and killed the chief engineer who at the time was standing at the stokehold door.

A Score of Shells Fired.  
For fully two hours, continued Mr. Stewart, the Vosges kept in front of the submarine. In all about a score of shells were fired, and nearly half of them hit the ship. The effect was terrible. One shot carried away the aft rigging, another wrecked the rooms of the four engineers, while the one which really sunk the steamer struck her below the water-line, almost under the bridge. The bridge itself came in for a good deal of attention, and suffered accordingly. All four officers who were on it being more or less injured; while the last shell fired carried away the funnel.

The Congestion From a Bad Cold Loosened Up in One Hour.

If Rubbed on at Night You're Well Next Morning.  
NERVILLE NEVER FAILS.

When that cold comes, how is it to be cured? This method is simplicity itself. Rub the chest and throat vigorously with "Nerville." Rub it in good and deep. Lots of rubbing can't do any harm. Rub it in some Nerville in the water and use it as a gargle; this will ease the cough, cut out the phlegm, assist in breaking up the cold quickly.

There is no telling how quickly Nerville breaks up a hard racking cough, eases a tight chest, relieves a pleuritic pain. Why, there isn't another liniment with half the power, the penetrative qualities, the honest merit that has made Nerville the most popular American household liniment.

A large 50c. bottle of Nerville cures ills of the whole family, and makes doctor's bill small. Get it today. The large size is more economical than the 25c. trial size. Sold by dealers everywhere.

### Dodging The Shells.

The submarine kept up the chase until shortly afternoon. So near was the enemy at times that they could plainly distinguish the seamen emerging from the conning tower, carrying the shells to the gun about to be fired they always lay down on the deck. The mess-room boy, who was hit in the leg by a bit of shell, watched the movements of those on board the submarine from the aft deck, and at intervals he would shout—"Look out, there; they're going to fire again."

The second mate was badly hurt. He was hit on the arm by a splinter of a shell, which first of all passed through the overcoat of the chief mate. The splinter made a hole in his arm about the size of a "crown" piece. The only lady passenger on board was a Belgian, and she was struck on the ankle, receiving a wound about an inch long.

Just as the captain decided to abandon the ship, a patrol vessel, fortunately, when in sight and he signalled to her. When the small boats were lowered it was found that several were leaking badly, having been riddled by shot. They soon, however, got aboard the patrol boat, and the Vosges sank shortly after two o'clock.

Mr. Stewart although invalided home, from his own steamer, volunteered to assist the engineers after their chief was killed, and worked for over an hour with them. He said that everyone on board remained remarkably cool during the trying experience.—Kirkwall Orcadian, April 10th, 1915.

[The Mr. Stewart referred to above is a brother of Mr. Peter Stewart that keeps the restaurant in the East End.—Ed. Evg. Telegram.]

## YOUR BOYS AND GIRLS

Nothing is more important to a child's physical well being than proper assimilation of food, and in order that this may take place, good teeth are essential. Digestion begins in the mouth and in order to masticate the food, good teeth are necessary. As the teeth grow they should be watched closely and brushed each night and morning. Should the first teeth show signs of decay the child should be taken to a dentist for advice.

Brown bread should be given children. They require it for the formation of bones and teeth, as it contains phosphates of wheat. In early childhood the teeth should be cleaned with a good dental preparation or castile soap, using a cloth or soft sponge to apply same. The bristles of an ordinary brush are too stiff and apt to injure the delicate gums.
