storm-tossed bird makes its appearance on the coasts already mentioned,

and sometimes in great numbers. In its natural, well-nourished state the little auk is so fat and full of oil that the Eskimos are said to have the custom of utilising its body as a lamp by inserting a wick under the skin of the bird, and setting light to it. Be that as it may-and even at this day lamp-bird of the Eskimos. This gal- travellers' tales are full of wonders, lant little diver, of dark-grey plum- if not untruths and exaggerationsage, whitish breast, and small, gull- taxidermists who have handled the like head, lives far up North, and is litle auk can verify the statement as Sugar refiners jumped the price of seldom seen outside the waters of to the very oily condition of it when the Arctic Circle. When, however, the bird is even in poor condition there is a continuance of heavy after having been buffed and weaken-

Along the north-east coast of Scotnoon, and the news didn't add a bit rador and the coasts of Norway and land some years ago hundreds of the Lapland, and Northern Scotland. When litle auk were picked up dead and The sugar kings are evidently out it does appear in fair weather in more dying consequent on a series of violent to gouge the profits from the people southerly latitudes than it usually tempsts out of the north and northone way or another. They produced frequents, it is no doubt because of east. More were also reported from a sugar shortage in Canada by exportits preying on the shifting shoals of far inland, where they had been ing sugar to Europe when they found the small fry that form its chief food. blown by the gales, against which they could make big profits that way. When these fish shoals are dispersed, they had been too weak to battle. And When public protests at last led Otta- or driven down into deeper water by when in a weak state they soon fall victims to the fierce attacks made on them by the great black-backed and other gulls. So weak does the little diver become when torn from its customary food by inclement weather that it can but go before the wind, and at times has been borne across Scotland, and from a hundred to a hundred and fifty miles across Nor-

> very difficult to keep a bird of this exclusively marine species in captivity, for to supply it with its natural food, is, of course, impossible. Some years ago, however, a Scottish naturalist did succeed in saving a little auk found by him in an exhausted state on the shore after a prolonged and very severe gale, and he got the bird to live on bits of raw cut-up fish. In time it grew so tame and so fond of him as to waddle after him about the house and grounds.
