Toronto-C. Rowland Orr, 11 King street Montreal and Maritime Provinces-A. McKim & Co., Montreal, Que.

London, Monday, June 23.

THE summer temperature in California according to latest reports, is 105 in the shade. No need to make it hot for anybody in that tropical clime.

THE Irish Canadian has reached the con clusion that Sir John Macdonald's Govern-ment craft will, at next general election, strike on the rocks of monopoly and com-mercial restriction and not all the skill of the consummate old mariner will save it from going to pieces. High taxation as a prosperity promoter is a big

GEN. Sir Edward Ridley Colbourne Brackenbury has been appointed Commissioner of Police for the British metropolis, in place of James Munro, C.B., who has resigned. General Brackenbury has in recent years been Political Under Secretary for the India Office, and enjoyed a salary of £1,200 a year. The income of the Commissioner of Police is £1,500. The metropolitan police force numbers 14,257 men. There are 38 superintendents, 838 inspectors, 1.369 sergeants and 12,020 constables.

THE Sarnia Observer is amused at the namer in which the Toronto Tory papers have been kicking over recent Government

have been kicking over recent Government appointments in that city. It says:

The trouble with Toronto Tory journals, and they are all Tory except the Globe, is that they believe the offices of this earth, and the fullness thereof belong first to the Tories, and secondly to the Tories of Toronto. It is all wrong for a Grit to get office, and if it happens that the Git halls not from Toronto, then the wrong becomes a villainous outrage. The result of the recent elections ought to teach our Toronto contemporaries of the Tory persuasion that Toronto ideas are not in harmony with those of the majority of the people of this Province.

Our contemporary is severe, but deservedly so. Toronto is not the earth. ly so. Toronto is not the earth.

KILLING CANADA THISTLES.

A correspondent, whose note we have mislaid, writes asking about an article appearing in the Advertiser ten years ago in which he says three specific days were mentioned on which, if thistles were cut, they would die, "sure pop." The directions are too indefinite to hunt up the article in question, and anyway we know of no such days as dates. The latter part of June is a good time. Cut them NOW. If in grain spud them or pull with pincers. Rid the pastures and fence corners of the pests thoroughly. A Dorchester township man had a field so thickly covered that scarcely a yard square free from thistles could be found. He left them till just before the bloom came out and putting pants on his horses and a skimmer and chain on the plow turned them under completely. After sional surface cultivation he sowed fall wheat and reaped a grand crop. Moreover all the thistles to be found on the field, as the farmer himself said, "you could put in

A SIGNIFICANT OMISSION. Several leading farmers who were in attendance at the East Middlesex farmers' picnic at Pond Mills spoke strongly agains the high taxation policy in force in Canada at the present time. There can be no doubt that the prosperity of the farmer and of all classes of the community, except a few monopolists, is retarded by the imposition of unn taxes, which are collected to swell a surplus that is finally spent in most questionable ways. Moreover, the system is ever a producer of extravagance and corruption. We like to hear the farmers talking out plainly on this matter. They have too long held their peace.

They are only looking to the best interests of the large majority of people when they expose the sham system of "protection" that now exists, and which is really an injury to mine-tenths of the

By the way, the London Free Press in its report suppresses those portions of the speeches which denounced the high tax licy and favored freedom of trade. Why? Our readers can form their own con-

ANOTHER "JUNKET."

It is semi-officially announced that Sir John Thompson, Minister of Justice, will go to England this week "on business of public importance." What Canadian business is there in England which High Commissioner Tupper cannot transact, under instructions from the Ottawa authorities? Is he a mere figurehead, whose principal duty it is to sit at public banquets and dis-pense tafly to the titled nabobs of Great pense tany to the three hands of Great Britain while the champagne in consumed by the gallon? If not, he should at-tend to the duties for which he was supposed to be appointed. When of High Commissioner was created, and a London palace and from \$15,000 to \$20,000 a year emoluments were attached to it, Parliament was told that the change would really effect a saving, as the High Commissioner could do all the business of the Dominion, and thus save the commission of financial agents and the traveling expenses of Ministers of Min

to the British metropolis. Now no pretense is made to dispense with the help of the paid financial men who have always aided the authorities in looking after their British indebtedness, and as for Ministerial junketing, the members of the Cabinet find excuses for taking trips across the Atlantic

as in the past.

The High Commissionership seems to be a good deal of a fraud. A live agent-general would do the work as well and for less than half the money. But what would Tupper do?

CHOLERA'S MARCH.

The cholera outbreak in Spain is alarming many people. It has even received the at-tention of Professor Wiggins, the scientific rank employed by the Dominion Government, who periodically raises a scare, founded chiefly upon his observations of planetary changes and influences. Wiggins asserts that Southern Europe, especially Spain, will be visited by disastrous earthquakes this summer, owing to the peculiar onjunction of the planets. The atmos pheric conditions, he adds, will be favor able to the spread of cholera, already prevalent to a limited extent in Spain, and the disease will probably reach this country. The Professor has given the Ministry the benefit of the information, and has urged that precautionary measures be adopted without delay. As documentary proof exists that the Ottawa prognosticator informed the authorities that the grippe epidemic would extend over both continents he now thinks that he has a right to be heard. It Wiggins were alone in his apprehensions, one might laugh at the idea of cholera getting a foothold in North America, but medical experts warn the public of the probable importation of the disease. Dr. Henry B. Baker, secretary of the Michigan Board of Health, thinks it very probable that the plague may ome. The Dominion quarantine authortites may do much to prevent the advent of the cholers, as they have done in the past. Only the other year two genuine cases got as far as Grosse

Isle, and were treated there, but the public cannot trust too much to that protection. In some past visitations, notably in 1854, the infection entered Canada by way of the United States, and though Surgeon-General Hamilton reports that the department under his supervision is ready to combat its spread, it is not prudent to take anything for granted.
The local boards of health should be up and doing. No nuisance should be permitted to exist, and alleys and back yards should be kept scrupulously clean. The fact is clean-liness and not medicine is by far the most effective weapon to use against this pest. Surgeon-General Hamilton tells us that it is a filth disease, pure and simple, and a blot on this intelligent era. There should be no such plague. It is, he says, susceptible to control and extermination, and yet it always exists at Cal-cutta to a greater or lesser extent. Should epidemic in Spain there are two communication by which it channels of might reach the States-through the continental routes and via Cuba. The latter is the more dangerous, for there are several lines of steamers constantly plying between Cuba and Spanish ports. The probabilities are that by energetic action cholera will be kept out of North America; but the salvation of the people lies in absolute cleanli-

THE UNITED STATES TARIFF. The McKinley Bill has now advanced nother stage, having been reported to the Senate by the Finance Committee of that chamber. In the course of a few days it will come up for discussion by the senators, and should the same line of procedure be adopted by them as by the House of Representatives it is quite within the range of probability that the bill will be carried through in the course of another month. A number of changes have been made in the measure by the Senate Committee, and doubtless some more will be made before the final stage is reached; but there is nothing to warrant the hope that the changes will be so serious as to radically alter the McKinley scheme, or to cause its rejection when sent back to the House.

ness. Are London and subufbs ready to

combat an outbreak? Hardly.

The Toronto Empire in writing of this bill, we observe, has the fatuity to say that it is a matter of no concern to the people of this country whether it is carried or rejected. We cannot understand how any Canadian can regard the matter that sublime indifference to with consequence. To do so is to give evidence of a lack of capacity to comprehend a very ordinary case of cause and effect; or it is to give evidence of absolute want of regard to the interests which are threatened by the measure. Let any one consider the operation of the United States tariff, as it has come out of the hands of the Finance Committee of the Senate and say whether, in his opinion, it is of no consequence to the farmers of Canada, and in particular to the farmers of the Province of Ontario.

The first article in the agricultural schedule is horses, and the has left this article as it came them from the House. It is proposed to levy upon horses imported into the United upon horses imperted into the United States a duty of \$30 per head—horses valued at \$150 and over, to pay 30 per cent. ad valorem. The farmers in this country find in the United States a market for horses to the value of over \$3,000,000 every year, and that country is their best and almost their only market for carriage and other horses of the best classes. The duty of \$30 per head upon all horses valued at less than \$150, of \$45 on horses valued at \$150, of \$60 on horses valued at \$200, etc., would operate to very greatly lessen the sales of Canadian horses in the United States, if not to prohibit sales, besides largely reducing the profits upon them. It would mean a very serious loss to Canadian

There is again the duty on cattle under 1 year old of \$2 per head, of cattle more than 1 year \$10 per head, of hogs and sheep \$150 per head, and of all other animals 25 per cent ad valorem. Our present sales of these animals to the United

would be a prohibitory duty, and our farmers would either have to cattle, sheep and hogs to the States at reduced prices or breed fewer for the market.

Barley, which is one of our staples in Ontario, is exported to the United States to the value of over \$7,000,000 every year, and that country is our only market for barley. The McKinley Bill as it left the House fixed the tariff at 30 cents per bushel of 48 pounds, and the Senate Committee has reduced it to 25 cents. It is not likely that a lower rate will be agreed upon, and the chances are in favor of the higher. No argument is needed to prove the effect of such a heavy duty upon our sales of this grain in the States market; and with the low prices realized last year it is certain that Canadian farmers yould be obliged to go almost wholly out of barley growing, thus losing at one stroke a business of \$7,000,000 a year. Then there is the duty of 25 cents per

ashel on wheat, of 40 cents per bushel beans and peas, of 25 cents per bushel on potatoes, of 15 cents per bushel on oats, of 25 cents per bushel on flax seed, of \$4 per ton on hay and of 5 cents per dozen on eggs. Is there any man in Canada who is not either daft or mindless, who will say that such a scale of duties proposed in the United States Congress is not a matter of concern to the people of this country, and especially to our farmers?

The Empire perhaps feels that it is bound to stand by the Government at Ottawa, whose tariff increases of last session have been thrown down as a challenge to th Congress of the United States. But that journal is very greatly mistaken if it sup poses that the great agricultural class of Canada shares its indifference or conempt for the McKinley Bill. It is to them a matter of the very gravest concern, and the gravity of the situation is heightened by the refusal of the Canadian Government to make or consider any proposal for the effecting of closer and freer trade between the two countries. The McKinley Bill, if carried, means great injury, if not ruin, to a large number of farmers in this country, whose circumstances have been seriously embarrassed by eleven years of high taxa-

Paul Peel's Success.

Canada has just reason to be proud of the success of the young artist, Paul Peel, who has carried off the grand gold medal of honor at the Paris Salon. Mr. Peel is a native of London, Ontario, and is not yet 30 years of age. The winning of this medal is a distinction which places the successful artist among the great painters of the age, and insures his reputation beyond gainsay. We are sure that Canadians will rejoice that so great a distinction has been won by one of themselves. Mr. Peel intends visiting his native land soon, and he may be sure of a hearty reception. ception.

THE Chattanooga (Tenn.) Times suggests that the South take a hand in raising \$100,000 for a monument to General Grant. The Times would have the memorial placed at Appomatox Court House, and have inscribed on it: "To the memory of U. S. Grant, our magnatimous conqueror." It would also have the dedicating the work solely of Southern soldiers.

### Save Your Hair

BY a timely use of Ayer's Hair Vigor.
This preparation has no equal as a dressing. It keeps the scalp clean, cool, and healthy, and preserves the color, fullness, and beauty of the hair.

"I was rapidly becoming bald and gray; but after using two or three bottles of Ayer's Hair Vigor my hair grew thick and glossy and the original color was restored."—Melvin Aldrich, Canaan Centre, N. H.

"Some time ago I lost all my hair in consequence of measles. After due waiting, no new growth appeared. I then used Ayer's Hair Vigor and my hair grew

#### Thick and Strong.

It has apparently come to stay. The Vigor is evidently a great aid to nature."

—J. B. Williams, Floresville, Texas. "I have used Ayer's Hair Vigor for the past four or five years and find it a most satisfactory dressing for the hair. It is all I could desire, being harmless, causing the hair to retain its natural color, and requiring but a small quantity to render the hair easy to arrange."— Mrs. M. A. Bailey, 9 Charles street, Haverhill, Mass.

"I have been using Ayer's Hair Vigor for several years, and believe that it has caused my hair to retain its natural color."—Mrs. H. J. King, Dealer in Dry Goods, &c., Bishopville, Md.

#### "BE MINE?" nd it was a fact accomplished!

Both these ladies have LEVEL HEADS. They steadily use DR. CAMPBELL'S LIFE-RENEWISH ARSENIC COMPLEXION WAFERS, which bring

The feelings back of Youth's bright Spring, And, linked with Juno's queenly grace, A HEBE'S form a PSYCHE'S face. And the man does not live who can resist such a combination of physical charms, to say noth-ing of attractions, mental and otherwise. From a man BLESSED with SUCH a life companion

EVERY kind of trouble goes, Like the last year's frost and snows.

Where is BARNUM, Very the museum proprietors Either of these fascinating ladies would b. CHEAP at \$200 per week. Every newspaper would write up and publish an interview with these Feminine

" CHAMPIONS OF MATRIMONY,"

and crowds would flock to behold them and the vigorous HEALTH and BEAUTY devel-oped in them by the use of the wondeful Wafers of Dr. Campbell. Here is a letter received March 7, from a Walnut Hills, Cincinnati (O.,) lady—"Inclosed flug \$5 for six more boxes of Dr. J. P. Camp-bell's Safe Arsenic Complexion Wafers; they are too precious for anything."

#### That RED NOSE Again!

As kissing aye by favor goes, Let CAMPBELL softly tell. The man who sports a RUBY nose, Will never "ring the belle."

Reform it all, both root and branch,
For every wise man "nose" this—
That CAMPBELL'S Wafers SURE will blanch
A RUBICUND PRO-BOS-CIS,

RED NOSES, BIRTHMARKS, MOLES, WRINKLES, PIMPLES, BLACKHEADS, MUDDY or YELLOW SKIN, GUNPOWDER MARKS, PURPLE SPOTS, GROW'S FEET, etc., etc., all DISAPPEAR by the persistent use of DR. CAMPBELL'S SAFE ARSENIC COMPLEXION WAFERS! beware of worth-less imitations.

#### EVERY LOVELY MAIDEN MARRIES!

Who CAMPBELL'S ARSENIC WAFERS And CAMPBELL'S by the bridegroom blessed.

When the lovely maiden marries. PROVE this TRUTH BY TRYING DR. CAMPBELL'S "LIFE-RENEW-ING" SAFE ARSENIC COMPLEXION WAFERS. AND NONE OTHER, OR DISAP-POINTMENT AWAITS YOU.

Bennington street, Boston Mass., lady writes Please find inclosed \$5; send me another six boxes of your DR. CAMPBELI/S SAFE ARSENIC COMPLEXION WAFERS. My skin was very yellow, but it is rapidly become in a beautiful white, so that if I keep on ball in a manner become 'chielled Parian. Formerly I was very angular, but a great improvement is apparent in my form, so much so that my mother compliments me on my shape, which she declares now to be the most symmetrical in Boston, but then, of course she-sees with partial eyes."

Like leaves on trees, the race of man is found,

Like leaves on trees, the race of man is found, Now green in youth, new withering on the ground. ground.

But, "nous avons change tout cela," Every box of DR. CAMPBELL'S "LIFE RENEW-ING" ARSENIC COMPLEXION WAFERS is a "century" box. Imbued with their LIFE PROLONGING principle, every man or womat may become indeed a human "century plant, and, being their SECOND century much stronger and lustier than they commenced their FIRST. TRY them,

### A RED NOSE!

NO LONGER! NO LONGER!

A BROOKLYN LADY, for years the distressed possessor of a NOSE the carming that of which would have brought a BLUSH to the scarred check of Vesuvius, writes—"Your DR. CAMPBELL'S ARSENIO COMPLEXION WAFERS have done wonders; my 'bete noire' no longer invites or attracts the attention of every one I meet, but is now in no way different from the NOSE of ordinary mortals, thanks to the "PRECIOUS WAFERS."

the "PRECIOUS WAFERS."
