Within a few hours they were on the track of a herd of five, and early next morning one of the ambitions of the lives of both was realized, for each had shot with his own rifle a good Canadian bull moose.

Within a few miles of the line of railroad, to strike off at random into and more or less cultivated, artificial the woods and pick up moose as if escapes are created which drain off paradise for hunters.

## THE SHAVING BRUSH A GERM CARRIER

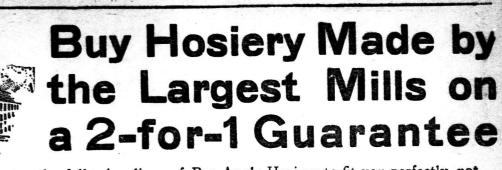

More To Be Feared Than the lounge chair, the desk of Charlotte Razor-The Hygiene of the Barber Shop.

Discussing the hygiene of the barber's shop, the British Medical Journal says: The great carrier of infection to the face, propriately, it now is preserved in the be it coccogenic and hyphognic, is the Burns Museum at Alloway. Perhaps shaving brush, and not the razor. Therefore it is the shaving brush that should receive special attention.

Boiling the brush is out of the question; dry heat. In default of that, thorough washing in hot water and subsequent disinfection in a carbolic or other reliable antiseptic solution is indicated. As pads of cotton wool are not efficient for lather-I had forgotten all about the matter ing as substitutes for the shaving brush, "Accidents will happen" is a time- in the press of business when, a it would be desirable that inventors should set their wits to work and find some substance which might take the remedied. During 1998 there were 96 and once more I met Mr. Ralph and place of the brush-that is, something cheap, that could be destroyed after using The ideal method for hair brushes is to

sterilize them by means of dry heat. This is already in use in one or two London hair-cutting saloons. The absurd revolvnot a single fatal accident occurred In due course the article appeared in ing or machine hair brush should have last year. The worst accident during Harper's. One of them sent me a been scrapped long ago. It is curious to the same period in another plant copy, and a rattling good article it see this filthy apparatus still in operation where three thousand men are at work was, pictures and all. But what puz- in quite fashionable hair-dressing places. was the loss of a couple of fingers zled me was how it had all happened. This revolving brush is not only bad for I the victim in the chair, but it is distinctly bad, too, for the operator himself. After the process of hair cutting the fine hair clippings and scurf are thrown up into the respiratory passages of the barber. Clippers are to be avoided, and their cutting offices firmly refused, even though When you give your child a so- a pained expression should pass over the called "soothing" medicine you are countenance of the artist. Clippers are not curing its sickness. You are not always easy to put together again overdose may kill the child. When to say, should not be placed in antiseptic solutions, but should be put in methy lated spirits or alcohol, and thoroughly wiped with a sterilized piece of gauze. ernmnt analyst that this medicine Metallic combs can be dipped in spirits is safe. And you have the word of thousands of grateful mothers that to spirits before being again required. this medicine will promptly cure all Styptic alum blocks should be done away minor ailments of childhood. Mrs. with once and for ever, and the danger Alphonse Roy, Scott Junction, Que., of inoculating syphillis through a razorsays: "My little one was weak and cut thus avoided. As to soap for shaving, sickly and used to cry day and night, it should be put up aseptically in powder but since giving him Baby's Own in small tubes or capsules, one for each

In conclusion, the hairdresser's saloon should be furnished much on the lines of dealers or by mail at 25 cents a box an operating theatre, and the hairdressers should be scrupulously clean in them selves and wear clean white jackets.

We guarantee the following lines of Pen-Angle Hosiery to fit you perfectly, not to shrink or stretch and the dyes to be absolutely fast. We guarantee them to wear longer than any other cashmere or cotton hosiery sold at the same prices. If, after wearing Pen-Angle Guaranteed Hosiery any length of time, you should ever find a pair that fails to fulfill this guarantee in any particular, return the same to us and we will replace them with TWO new pairs free of charge.

That 2 for 1 guarantee-the most liberal given anywhere -is backed up by the largest hosiery mills in Canada. You can depend upon the guarantee being fulfilled to the last let-

Buying hosiery on this plan you make doubly sure of satisfaction, for if the hosiery does not fulfill the guarantee the makers have to pay a double penalty.

But after you've worn a pair of Pen-Angle Hosiery you'll understand why we give this 2 for 1 guarantee, for you will have discovered your ideal hosieryform-knitted, seamless, longest-

The reason for Pen-Angle superiority is due to the exceptional quality of the cashmere and cotton yarns we use. And because we knit them on Penmans' exclusive machines. We have the sole rights to use these machines in Canada.

#### Seamless Hosiery

These machines form-knit the hosiery to fit the form of the leg, ankle and foot perfectly, without a single seam anywhere to irritate the feet or rip apart.

They reinforce the feet, heels and toes-the places that get the hardest usage-without you ever being aware of any extra thick-

Don't be content another day with hosiery which has those horrid seams up the leg and across the foot-with hosiery

SCOTTISH AND IRISH BOGS.

The recent bog slide in County Roscommon recalls the fact that Ireland has still close on 2,830,000 acres of bog distinct understanding all Moss Flanders, in Perthshire, still conbog slide-great quantities of water They went. The skill those men accumulate at the bottom of the bog vent evaporation, and the pressure of the steadily accumulating water either raises the superincumbent mass and makes it overflow its natural boundaries, or bursts a subterranean passage Where, however, the fringes of the bogs have been reclaimed, as in the case of most of the Scottish bogs, and the land in the neighborhood drained were prairie chickens-what a the floods. Hence the main reason for the paucity of bog slides in Scotland compared with Ireland, where the bog lands are still in a "state of nature." Scottish-American.

## RELICS OF THE GREAT.

John Bunyan's anvil, Napoleon's Bronte, John Wesley's bedstead. Goldsmith's armchair, the hat-stand of Dickens are among the material relics of the great, which have appeared at auction in the past decade. More are promised. We saw the family Bible of Robert Burns bring \$1,500 in 1904. Aphis bureau, to be offered at Sotherby's may join it. Used by him at Ellisland and Dumfries, it doubtless saw the birth of "Aul Lang Syne," "Scots Wha

## Why Tobler's?
