### EATING VEGETABLES.

A Few Valuable Points on a Subject of General Interest.

Vegetables form a large part of the diet of every civilized nation. What would the Irish do without their potatoes, or the Chinese and Japanese without their rice? Fresh vegetables are very necessary if health is to be maintained; and sailors who go on long journeys require a certain amount of fresh green food and fruit otherwise they develop a disease known as "scurvy."

All vegetables are good eaten raw, but the bulk of them undoubtedly should be cooked, to a greater or lesser extent. The cabbage is an example of the former. It is a very healthful article of diet, and contains various "organic salts" which are highly beneficial.

Vegetarians, or those who never eat meat, depend for their muscle-forming elements largely upon the bean, pea and lentil family, which form "the beefsteak of the vegetarians."

Many persons find vegetables hard to digest. If so, they should eat them sparingly.

Asparagus is by many considered a great delicacy and is certainly one of the choicest of all vegetables. It is considered to be especially good for nervous complaints and for diseases of the heart, including palpitation.

The Word "Scat."  
It seems to be generally understood that there is no word of its letters that can be said quicker than "scat."

Mountain Tobacco.  
In Switzerland a weed called mountain tobacco is smoked in great quantities. It is powdered before using and causes the smoker to become a mental and physical wreck.

The Lawyer's Fee.  
"Yes," said the first burglar disgustedly, "I cracked a lawyer's house the other night, and the lawyer was there with a gun all ready for me. He advised me to get out."

The Facetious Operator.  
"I say, mister," said the cadaverous man entering the telegraph office, "could you trust me for a telegram I want to send my wife? I'll pay you to-morrow."

Telepathy.  
"I suppose," said the physician, smiling and trying to appear witty

### THE JAPANESE SASH.

A Quaint Accessory That is in the Height of Style.

Wear a Japanese sash, or obi, with your simple little evening frock if you happen to be slender and willowy and girlish. It is the quaintest accessory imaginable, and you may short time for yourself in a very short time. First you catch your hare. That is to say, you buy three yards of thirty inch wide silk of an expensive a sort as you can afford, and you stay both edges with baby ribbon of a matching shade. That will prevent the silk length from sagging at either side while you are making a band by plaiting in one end, drawing it about your waist in soft, deep folds and, having measured the exact length required, plaited it across at that end.

### Lost His Hair, Beard and Mustache

Terrible Plight of a Pennsylvania Man Reported by a Prominent Citizen:

"About two years ago my hair, beard and mustache started to come out in spots. These spots were entirely bare of hair. Seeing PARISIAN SAGE advertised, I purchased four bottles, and after using two of the bottles, the hair came in until now I had as good a head of hair as I had before this trouble started.

I can truthfully recommend this preparation to any one for what it is recommended for. Sam Galder, Jamison City, Col. Co., Pa. Oct. 11, 1911." Please bear in mind that PARISIAN SAGE is not guaranteed to grow hair on bald heads. In Mr. Galder's case the hair root was not dead and there is no good reason why PARISIAN SAGE should not do
