IN THE SPRING

The Spring is a time of anxiety to mothers who have little ones in the home. Conditions make it necessary to keep the baby indoors. He is often confined to overheated, badly ventilated rooms and catches colds which rack his whole system. To guard against this a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. This will prevent colds, constipation or colic and keep baby well. The Tablets are sold by medicine dealers or by mail at 25 Medicine Co., Brockville, Ont.

There is a certain young man who wns a nice auto, and judging from the look on his face as he was vainly trying to pry the car out of an all had lost his faith in that old legend about seeing the first blue bird of friendly postal clerk, had stroked out says it may be good luck to see the first blue bird but surely not to take a decided success both socially and her for an auto ride on Watford streets in the spring.

Our scribe of this week suggests the example of the British Government during the Napoleonic wars, of taxing windows. A good many buildings in old London to-day show bricked up windows. He thinks, in case of this, it would reduce our tax considerably and his work enormously if some of our windows were bricked up.
