Of interest to Farmers

IMPORTANT TO FARMERS

An Act to Encourage the Improvement of Live Stock

Be it enacted by the Governor, Council and Assembly as follows:

1.—In this Act "Scrub Bull" means an uncastrated male calf or bull, the progeny of parents either of which are not registered or eligible for registration in a Herd Book recognized by the Nova Scotia Department of Agriculture.

2.—Except as in the Act otherwise provided no person shall own, keep or harbor any "Scrub Bull" more than nine months old without obtaining a permit from the provincial department of Agriculture and not even then unless such bull is kept in a stable or paddock or pasture with walls or fences of such construction that he cannot get out.

3.—The fact that a bull has broken through such a wall or fence shall be prima facie evidence that such walls or fences were not of proper construction.

4.—In the case of a bull kept in a paddock or pasture one or more stiles of which constitute boundary fences, the cost of construction shall rest upon the owner of the bull.

5.—Any person may castrate any "Scrub Bull" which he finds unaccompanied by an attendant on any public highway or common or trespassing on any field not securely fenced to prevent the passage of such bull, or other wise not under proper control.

6.—Any Agricultural Society may appropriate out of its funds a sum not exceeding twenty five dollars in any one year to pay for the services of any person or persons whom they may employ to castrate any "Scrub Bull" unaccompanied, trespassing or not under control as foresaid.

7.—In any case where it is impractical for an owner of a cow to procure the services of a pure bred bull such person may on a statement to this effect sworn to before a Justice of the Peace and on approval of the Superintendent of Agricultural Societies, or an officer appointed by him, obtain from such Superintendent a permit to keep a scrub bull for a time fixed by such permit; in any such case the Superintendent of Agricultural Societies may, pending further enquiry, issue a special permit.

8.—The Act shall come into force by a proclamation by the Governor-in-Council on January 1st, 1920.

9.—Every person violating or failing to comply with any of the provisions of this Act shall be liable to penalty not exceeding one hundred dollars.

Should Alfalfa be Grown Alone or in Mixture with Grasses?

(Experimental Farms Note)

So far, alfalfa is generally grown alone. The difficulty to secure a good stand experienced in the past is to quite an extent responsible for this practice, as it has become a sort of a hammered in rule to "give alfalfa every possible chance to establish itself." On this account it is generally deemed unwise to sow any grass with the alfalfa because it is considered that, in doing it, there may be a certain danger of the alfalfa not getting the best opportunity to gain a firm foothold. This view is undoubtedly correct in the majority of cases, especially where, on account of climatic and soil conditions, the starting of alfalfa may meet with some difficulties.

On the other hand, experience has shown that, in sections where alfalfa can be grown easily, some admixture of certain grasses may give excellent results. In Western Canada mixtures of alfalfa and Western Rye grass yield excellent crops providing that the mixture are so balanced that the alfalfa and the Western Rye are given equal chances to establish themselves. In Eastern Canada several grasses,

have been tried in mixture with alfalfa, and the results so far obtained certainly seem to indicate that such mixtures may profitably be grown providing that the right varieties of grasses are chosen.

When choosing the grasses to be used in mixture with alfalfa, it should be kept in mind, in the first place, that such grasses as are apt to choke out the alfalfa on account of their inclination to spread out must be avoided, and secondly, that only those which are early are of any particular value. Timothy, for instance, which reaches full development comparatively slowly, is rather unsatisfactory in mixture with alfalfa. When the latter is ready to cut for hay, the timothy is hardly more than half ready, the consequence of course being that the full benefit of it is not being realized. To defer the cutting of the mixture until the timothy is at its best, can of course not be recommended, for, by doing so, a poorer quality of hay will be secured as far as the alfalfa is concerned. It will also check the prompt development of the second crop.

The grasses which go best with alfalfa are those which are ready to be cut at the same time as the alfalfa. There are three grasses of this type that deserve to be mentioned, viz: Tall Out Grass, Orchard Grass and Meadow Fescue.

The Tall Out Grass is comparatively susceptible to cold winters and should therefore not be used in districts where the winters are severe. Where it can be grown without losses on account of winter killing, however, it goes excellently with alfalfa. The Orchard Grass is especially well adapted to well drained soil and, on such land, it may to great advantage be used in mixture with alfalfa. Its nutritive qualities are excellent and, besides, it has reputation of being one of the best weed checking grasses known.

The Meadow fescue which is universally recognized as one of the most valuable grasses, especially for dairy cows, has the advantage over both Orchard and Tall Out Grass in that it is hardier. It may therefore be used with alfalfa in districts where the former grasses many suffer from lack of winter hardiness. It also comes on quicker after cutting, contributes more to the bulk of the second hay crop, provides more pasture, in case the field should be used for that purpose, and yields better results on land which is somewhat wet on account of imperfect drainage. On the whole, the Meadow Fescue may be universally recommended in mixture with alfalfa.

M. O. MALTE, Dominion Agrostologist.

ROADS AND RAINY DAYS

Ever live on a farm? Know anything about farms and farm life? If you have, you know the answer to this question.

When does a live and industrious farmer prefer to run into town to attend to business there?

In stormy weather of course. The wise farmer takes advantage of good weather to keep his farm going on a paying basis. He isn't a loafer. He makes capital out of fair weather. He knows that sunshine is worth as much to him as his acres, his tools and his knowledge of the farming science. He will no more waste sunshine than he will waste fertilizer, grain or money.

This is true because the modern farmer is a first class business man. He does on a rainy day those things he can do then as well as on a bright day, in order that he may have the bright day for the big and important job of making his farm produce its share of the world's necessities.

And on rainy day he can go to the city do his buying, market his produce, and do any manner of business which he has been putting off during good weather. That is, he can do so provided the roads permit.

WHY IS IT

that chronic skin diseases which have defied all other treatments yield to Zam-Buk?

It is because Zam-Buk is germicidal, and also has such power of penetration that it reaches disease in the underlying tissues and cures from the "root" up. That is the only way a permanent cure can be effected.

Mr. H. C. Buckley of 461 E. Broadway, Portland, Oregon, says: "For chronic skin diseases there is nothing like Zam-Buk. For fifteen years I had eczema, and I tried an endless number of so-called 'eczema cures,' but nothing was capable of curing me permanently until I used Zam-Buk. Ten months' use of Zam-Buk has effected a complete cure."

For ulcers, abscesses, boils, ringworm, blood-poisoning, piles, burns, scalds and cuts, Zam-Buk is equally good. All dealers or Zam-Buk Co., Toronto. 50c. box, \$ for \$1.25.

O. S. DUNHAM, Bridgetown

Work at the ware house was resumed this week. Mrs. T. A. Croaker has been a recent guest at C. H. Jackson's. Miss Stevenson has gone to Montreal for a time to visit friends. Mrs. Dr. Vernon Morse and little daughter were week end guests of relatives here.

Miss Ida Williams spent a few days last week at the home of her brother, R. E. Williams. Our school has been much broken up this winter on account of whooping cough. Most of the children have fully recovered and soon all will be able to attend again.

A Pleasant Evening At Belleisle A sleighing party from Tupperville and Round Hill crossed the river Tuesday evening and drove to the home of Mrs. W. F. Parker where they were met by the young people of Belleisle. A very enjoyable evening was spent in games and music. At a late hour refreshments were served after which the party left for their homes, all having spent a most delightful evening.

VOTED "WET" BURLINGTON, Vt., March 3.—Towns throughout Vermont voted on the question of license yesterday and this morning it was estimated that 75 per cent had voted "wet". Burlington, St. Albans, Montpelier, Rutland and other large places which have been strongholds of prohibition for years voted themselves into the "wet" column by substantial majorities.

"Smile and the world smiles with you." There's truth in that saying, I'll own; But now that there's flu, it's likely, if you Should sneeze you will soon be alone.
