Lumber operations are in full swing here. Col. G. A. LeCain and others being engaged in the business and Mr. S. T. Chipman's mill doing the sawing. One day last week Mr. John Woodland hauled to the mill a pine tree that sawed out sixteen hundred feet of lumber and another which sawed over twelve hundred feet. This goes to show that all our large forest trees are not all cut away.

While others are engaged in lumber operations some are busy cutting and hauling stove wood. The people are very enthusiastic in this latter enterprise, as it assures them the knowledge of having their apple barrels at their doors, thereby saving a lot of worry as to getting the barrels. This seems right, to patronize home industry. We wish the enterprise success.

Mr. and Mrs. W. C. Healy returned home from Halifax Saturday. Mr. Healy was engaged in the inspection of fruit there.

DIRTY EGGS ON THE FARM. While there are a few egg producers who take the best care of their product, the average farmer considers the eggs produced on the farm a by-product and makes very little provision for their care, aside from gathering them. A large loss is caused by dirty eggs, the number being enormous, and, according to the estimate of Secretary Wilson of the Department of Agriculture, this money loss to the farmers in the United States amounts to about \$5,000,000 annually.

This loss is very largely brought about by not gathering the eggs often enough. Farm and Ranch Review opines. In wet weather more dirty eggs are found than at any other time. This is caused by the fact that the hens' feet are often covered with mud or other filth, and in going on the nest to lay she soils the eggs already in the nest.

A NEW AFRICAN BEAN. Grows in the Dahomey Region and is Reserved For Chiefs.

M. Augustus Chevalier gives an interesting account of a vegetable of the bean variety which grows in Africa in the Dahomey region. The grains, the size of a very small pea, are formed underground and appear in pods. There is no evidence that this plant is known in Europe. Previously we knew two plants of this kind in Africa, one of them resembling South American plants, and the other is the voadzou, this latter being the only species of the genus voadzou. The third plant which we mention here is cultivated for its edible grains. M. Eugene Poisson, who is familiar with the Dahomey region, pointed out its existence in the interior of the country. Such grains are sold in the markets of Abomey under the name of dol. The author observed the dol plants both in flower and in bearing young fruits and examined the dry grains which the natives obtained for him. The dol plant is a new species of voadzou.

The pods which are found at the root of the plant carry only one or two grains. When there are two grains these are separated by a complete partition, and the pod is narrower here. From this description it may be supposed that the pod is somewhat like the American peanut, in form at least, although it is of smaller size. As we find for the bean, the dol has several varieties, differing by the color of the grains, and these are oftenest white, but can also be black, red or variegated. The area occupied by the plant is very limited, being only a restricted region in the central part of Dahomey. It can be eaten in a very agreeable taste. Owing to the small size of the grain the production is very limited, and it is reserved for the chiefs or other favored persons. For this reason the Dahomey usage forbids the eating of the grains by women.—Scientific American.

THE DUTCH MILKMAID. Her Picturesque Costume and Her Robust Style of Beauty. Of all Zealand the particular costume of that province can be observed to the best advantage on the island of Waiheke. A milkmaid of Middleburg, for example, is a joy to look upon. Her spotless white cap bristles at the temples with kurrenkrauten like the ornaments of a prehistoric beaded. Her skirts are ankle high and padded generously at the hips. If she be naturally round and the skirts need no padding circumstances and the evidence of the fact is sufficient to stamp her the belle of the community.
