The *Scottish Farmer* Album for 1899, containing portraits of the leading prize-winners of 1898.

SUCCESSFUL INSTITUTE MEETINGS.

We are pleased to learn that Mr. John I. Hobson, of Guelph, and W. C. Shearer, of Bright, have conducted very successful institute meetings in West Northumberland, West Hastings and Prince Edward county during the past two weeks. The meetings have been largely attended, and interesting and profitable discussions have invariably taken place on all the subjects brought up by the speakers.

CANADA'S GREAT EXPOSITION AND INDUSTRIAL FAIR.

The twenty-first annual exposition and fair of the Industrial Exhibition Association of Toronto will be held at Toronto from August 28th to Sept. 9th, 1899. The motto adopted for this year is, "A greater than has ever been," and there is not the least doubt that the management will leave nothing undone to make the exhibition for this the last year of this century one of the greatest events of the kind in the history of the Dominion.

England pays Denmark more than \$20,000,000 annually for butter. Having educated her people to become expert butter-makers through her experiment stations and dairy schools, Denmark next undertook experiments in feeding pigs and the curing of bacon and other pork products. Since 1880 more than \$50,000 was expended in this one line of effort, and the best scientific talent of the country was employed. Until Professor Henry's work on "Feeds and Feeding" appeared, these extensive and invaluable experiments were not available to our people because they were printed in the Danish language. In his book on Feeds and Feeding Prof. Henry has devoted a whole chapter to the Danish pig-feeding experiments.

Publishers' Desk.

Sewing Machines.—We call attention to the advertisement of Messrs. Bailey, Donaldson & Co., 7 St. Peter street, Montreal, who are offering high grade sewing machines at manufacturers' prices. If you want a sewing machine it will pay you to send for a copy of their catalogue.

Fur Coats.—Have you ever enjoyed the luxury of a really good fur coat? If so, you will never use any other kind for a top coat in winter. It is by far the cheapest coat you can buy, for with any sort of ordinary care it will last a lifetime, and for real solid comfort there is nothing to approach it. As a preventive of grippe, rheumatism and kindred diseases it is better than all the remedies in the British Pharmacopoeia and the United States Dispensatory combined. This year the prices of such coats are lower than they have been for years, and there is no place where you can get better value for your money than at the store of Messrs. W. & D. Dineen, 140 Yonge street, Toronto. This firm have been in business in Toronto for fifty years and have a continental reputation as a first class fur house. You can therefore rely on getting just what they promise you with ample satisfaction and courteous treatment every time.

Famous Machines.—The claim made by the Deering Harvester Company in their advertisement that theirs are the machines which "have made America famous" contains more of truth, perhaps, than the casual observer might think possible. But those whose travels have led them to parts of the globe

"That Tired Feeling"

Is just as common and just as reasonable in horses as it is in men. When their blood is impoverished their appetite and energy leave them—their work feels twice as hard.

Dick's Blood Purifier

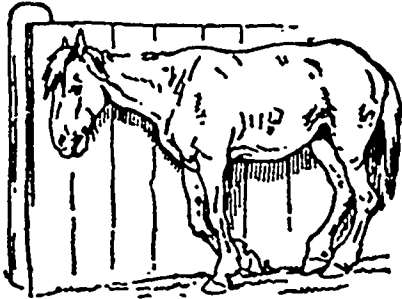

restores this lost vitality—The food is enjoyed—Every particle is digested.—The hide frees itself. Bots and kindred worms are destroyed and the horse thrives.

where the products of the field and farm, and the best means of harvesting and marketing them, are of greater interest than politics and the progress of nations, can appreciate the statement. In such places the introduction of the Deering machines has been infinitely more important to the people than the war with Spain, the question of territorial expansion, or of an Anglo-American alliance, and the fame of America as a great manufacturing country has been increased thereby. Wherever harvesting machinery is used the "Deering" machines are famous, and some of that fame attaches itself to the country from which they come.

The Wooden Hen.—This is not the hen of uncertain equilibrium, the "Noah's Ark" of our infancy contained, which though a

wonderful bird in many ways could not hatch a chicken. This is a still more remarkable "fowl," for it will double discount the largest

and most persistent "hiddy" in hatching chickens, and is accompanied by an "Aunt" which will bring them up with care after they are hatched. It is the invention of Mr.
