"We always fry ours in Cottolene."

Our Meat, Fish, Oysters, Saratoga Chips, Eggs, Doughnuts, Vegetables, etc.

Like most other people, our folks formerly used lard for all such purposes. When it disagreed with any of the family (which it often did) we said it was "too rich." We finally tried

and not one of us has had an attack of "richness" since. We further found that, unlike lard, Cottolene had no unpleasant odor when cooking, and lastly Mother's favorite and conservative cooking authority came out and gave it a big recommendation which clinched the matter. So that's

why we always fry ours in Cottolene.

Sold in 3 and 5 ib. pails, by all grocers. Made only 15

This remarkable statement to which we live t special attention, is from a Tennessee farmer. My ago is 63, I suffered intensely from Caterrh 10 years. Had interessee headache, took cold easily had continual rearing and augung in my ears, My loar ing began to fail, and for three years I was almost entirely deaf, and I continual 'ty grew worse. Everything I had tried, failed. In despair I commenced to use the Aerial Medication in wonderful. In less than five minutes my hearing was fully restored, and has been perfect ever since, and in a few months was entirely cured of Catarrh. Eli BROWN, Jacksboro, Tenn.

Hedicines for Three Months' Treatment Free.

Medicines for Three Months' Treatment Free. To introduce this treatment and prove beyond doubt that it is a positive cure for longness, Catarrh, I nreat and Lung Diseases, I will send sufficient medicines for three months' treatment free.

A new barometer showing minute variations of pressure has been invented by Mr. C. O. Bartrum, of London. About its middle the tube is expanded into a bulb, in which the upper surface of the mercury is. On the mercury rests a column of some light liquid. It is plain that a rise of mercury in the bulb will cause a much greater rise of the light fluid in the narrower apper tube the amount depending on the sectional area of the bulb as compared with that of the upner tube. Small changes of pressure can therefore be read with ener, and the maker claims accuracy to 1-200th of an inch.

Principal Fairbairn occupied the pulpit of St. Augustine Church, Edinburgh, at both services on a recent Sunday. There were crowded congregations.

Her many friends and admirers will read with genuine sorrow of the affliction which has come to Mrs. Oliphant in the death of her only surviving son.

Thirteen Missionares, twelve of whom are women, and nine going out for the first time, sailed recently for China, in connection with the China Island Mission.

Dr. Newman Hall, lecturing in Claytonstreet Church, Newcastle (Rev. J. W. Bow-man), gave some "reminiscences of a long life," interspersed with selections from his recently published "Lyrics of a Long Life."

Rev. T. Cochrane's overture in favour of the Assembly declaring March 15th to be the close of the Church's ecclesiastical year has been remitted by Edinburgh Presby tery to a committee for conference with a committee of the Supreme Court.

Sickening accounts come of desolating stave-raiding in the region lying to the north of lake Nyassa. Arabs are the ac cursed actors, and their plan is to surround a village by night, place a warrior at each door, order the inmates out, spear the men and boys, and capture the women.

Rev. John McNeill continued to address enormous audiences in Melbourne during the month over which his mission extended. Before leaving to commence services in Ballarat, Mr. McNeill was presented with an address on behalf of the Presbyterians, Mr. Burke Mr. McNeill's singing companion received an album.

Dr. Cameron Lees presided at the opening and dedication ceremony of the Chuich of Scotland Deaconess Hospital at Edinburgh, which owes its origin to the work of Professor and Mrs. Charteris. The building, with its complete outfit of medical appliances, has cost £3,400, and a sum of £500 has been subscribed for the expenses

At the opening of the Union Theological Seminary, Dr. Charles Briggs delivered an address which is very highly spoken of as thorougly evangelistic and entirely free from anything that could be objected to by the most conservative. The address is published in full in the columns of *The Evangelist*, and is very well worth reading, especially by students of theology.

The jubilee of Brighton-street Church, the mother of Evangelical Union churches in Edinburgh, has been celebrated by a series of services. "No fewer than twelve ministers who were formerly members of the church have,' writes a correspondent, "taken part in the celebrations, which included a conference on home missions, Temperance and children's meetings."

Rev Dr. Bevan, preaching to the Christian Endeavour Union convention at Sydney, N.S.W., said there were three evils to be guarded against in the present age; a pag anism which regarded life from a materialistic, immoral, and selfish standpoint; the revival of mediaval sacerdotalism; and a systematic pictistic sentimentality, which might be more dangerous than the two other

Recent experiments for determining the effect of massage upon the blood show that it increases the number of red blood corpuscles enormously, and also the hemoglobin, though to a less extent. In some cases there was an even greater increase in the white blood corpuscles. Dr. S. Weir Mitchell suggests that the increase is due to the bringing into the general circulation of corpuscles which have been previously accumulated in the smaller vessls of the larger viscera. Dr. Reynolds suggests that the increase may be only relative, and due to the withdrawal of a portion of the fluid elements of the blood into the tissues. The effects of massage seem to be identical with those of cold bathing and exercise.

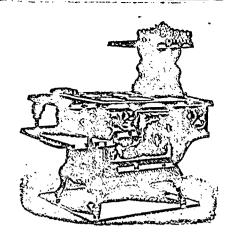

May 2nd, 1894.

My Dear Sirs,-I may say that I have used your Acetocura with great results in my family. It has given great relief, especially in Nervous Affections and Rheum atism, and I can confidently recommend it to any troubled with these complaints.

I am yours truly, J. A. HENDERSON, M.A., Principal of Collegiate Institute, St. Catharines. Coutts & Sons, 72 Victoria st., Toronto.

Henri Moissan, the French chemist, has made some new and interesting researches respecting the metal cromium. By availing himself of the intense heat produced by the electrical current, he succeeded in preparing cast chrome in a very small quantity which may be fairly represented by the formula CCr. When treated with lime or the double oxid of calcium and chrome, the metal produced under these conditions is more infusible than platinum, and takes a very fine polish. It is not attacked by atmospheric agents, not to any great extents by acids, and resists the action of aqua-regia and of alkalies in fusion. This preparation of chrome leads to some very important results in connection with the alloys of the metal. Alloyed either with aluminum or copper, it possesses some remarkable qualities. When pure copper, for instance, is alloyed with 0.5 of chrome it becomes endowed with a double power of resistance, is susceptible of a high polish and undergoes less change when exposed to atmospheric influences than when pure.

Dear Sirs, -I have been using Burdock Bitters for Boils and skin diseases, and I find it very good as a cure. As a dyspepsia cure I have also found it unequalled. Mrs. Sarah Hamilton, Montreal, Que.

Photography over 100 miles or more of distance is literally a new thing under the sun, yet they are doing it. From the hill at Poland last week Photographer Seaver, at Newtown, Mass., an expert with the camera, obtained a fine view of Mount Washington. The lens used was an imported novelty bought by the Rickers for this ex press purpose. It is a telescope lons, and will take a recognizable picture of a person on the hotel verands at a distance of half a mile. The view of Mount Washington was perfect. - Lewiston Journal.

directions on the wrapper. It does away with boiling or scalding the clothes and all that miss and confusion. The clothes are sweeter whiter and cleaner, washed in this way.

Thousands use Surprise Soap on wash day, why don't you?

The Ivanhoe tunnel, now nearly completed, from Rusk, near Leadville, to Ivanhoe, Colo., will be the third in length in the United States, being surpassed only by the Hoozec tunnel and by the Boulder tunnel, in Montana. It is 9,400 feet long, and owing to the great altitude-10,800 feetdoors will be placed at each end to exclude snow, and the tunnel for several hundred feet from either entrance is to be heated by steam. Work was began in August, 1890.
