

tersea village on the south side of the lake to the shore of Dog lake, two miles distant, communication can be made with the Rideau canal.

Belleville Near the city of Belleville marl also occurs, but no data are to hand regarding its extent. It is presumably not so extensive as the Sheffield deposits.

Yonge Tnp. In the township of Yonge, near the village of Athens.
Athens and in close proximity to the line of railway from Westport to Brockville, there are several deposits of marl which have never been exploited. One of these is on lot 13 range VIII., and is said to occur over an area of at least 25 acres, with an ascertained depth of seven to fifteen feet. The material is also reported as occurring on lots 7, 8 and 9, range IX, in the bottom of Mud lake, and possibly at other points in the vicinity.

South Elmsley. In the township of South Elmsley it is found underly-
Bass Lake ing portions of Bass lake, with a thickness of three to four feet, but the exact extent of the deposit is uncertain. This place is but a short distance from the foot of the Rideau lake at Oliver's Ferry.

Wilberforce In the township of Wilberforce, near the Bonnechère
Mink Lake river, and about three miles from the line of the Canadian Pacific railway between Douglas and Eganville, is Mink lake. This lake has an area of over 1,000 acres, the marl being visible at many points and probably occupying most of the bed of the lake. The thickness of the deposit has been proved to be at least nine feet in places and may be much greater in parts of the lake basin. The area can be easily drained so as to expose a large surface of the deposit.

McNab Tnp. In the township of McNab the lower end of White
White Lake lake shews a large area of the marl, extending over some 700 acres, and ranging from five to seven feet in depth. The area could be readily drained so as to expose a large body of the material, but the distance from the town of Arnprior and railway communication is about eight miles. It is about the same distance to Glasgow station on the Canada Atlantic.

Ross Tnp. In the township of Ross, several deposits are found in
Green Lake connection with a chain of lakes which extend south-east from Muskrat lake, near Cobden village. On one of these,
