NOTICE.

List of subscribers to the "Journal of Agriculture."—In order to ensure regularity in the delivery of the "Journal" to subscribers and members of agricultural societies, the Secretaries are requested to forward, as soon as possible, to the Department of Agriculture, at Quebec, lists (carefully written out) of the subscribers, in alphabetical order, in groups according to their divers post-office addresses, and noting the French or English edition of the "Journal" each individual subscriber wishes to receive.

NOTES BY THE WAY.

"Rape."—Prof. Henry, of the Agricultural Station of Wisconsin, among some very sensible advice on the growing of rape, recommends the sowing of that plant among rye, though not among barley or oats :

Seeding with Rye

"If sown with winter rye, harrow the rye field in early spring, and sow about 2 pounds of rape seed per acre, harrowing lightly again after the seed has been sown. Such harrowing will usually be helpful to the rye crop.

Seeding with Oats and Barley.

Rape seed can be sown along with oats or barley, but if this is done the growth of
