A MARKED DIFFERENCE

Intending insurers who will take a little trouble to ascertain the facts will find a marked difference in the cost of insurance which is placed with The Equity Life Assurance Company and that placed on the usual terms of other Companies.

EXAMPLE

A twenty payment life policy on the without profits plan, issued by The Equity, at age 25 costs \$22.50 per annum. The rate charged by 13 Canadian Companies is \$25.35, a difference of \$2.85 per annum. This annual difference at 5% interest would amount to \$99 cash in 20 years—an important item of saving in the cost of each \$1000 of insurance—or \$25.35 would purchase an immediate and constant insurance of \$1126 instead of \$1000. For a with profits policy of \$1000 the thirteen companies charge \$30 and six of them give an average estimate of profits of \$209. The estimates of the others are similar. For the same premium The Equity will guarantee a total abstinence a cash dividend at the same time of \$213.

\$213 Guaranteed Is Surely Better than \$209 Estimated. For any desired information address
