

*Are you in favour of selecting again in document 32 C/5 one principal priority and a limited number of other priorities for each major programme?*

*How should the principal priorities in document 32 C/5 be strengthened in terms of resource increase?*

*Regarding the selection of the principal priorities for each major programme, do you:*

- (a) favour the retention of the same principal priorities as in document 31 C/5 Approved?*
- (b) prefer the designation of new principal priorities? If so, which ones?*

*What further comment or possible suggestion would you like to make on the content, the main orientations or on the way these priorities should be selected, articulated and dealt with in the future?*

8. By major programme, the other priorities include:

- Major Programme I: educating for a culture of peace, science and technology education, technical and vocational education and higher education;
- Major Programme II: science and technology capacity-building, improving scientific basis for environment protection and sustainable use of natural resources; promoting sustainable development in coastal zones and small islands;
- Major Programme III: human rights; social transformations and future-oriented activities;
- Major Programme IV: reinforcing normative action in the field of culture and strengthening links between culture and development;
- Major Programme V: promoting freedom of expression and freedom of the press and helping to reinforce communication capacities.

*Should those priorities be maintained in document 32 C/5? If not, what other priorities should, in your view, be considered? Would you favour a different clustering and designation of the other priorities? And if so, which one?*
