FRUIT

REPORT OF

To the Honourable

SIR,—It is a pleasure to report to the Association, for the year 1878.

The past season has been a very favourable one for the fruit of those varieties of apples to meet the demand for grapes never well supplied, and the crop good, and the quality good.

The meeting of the Association was held on the 18th inst. and was attended by a large number of interest and information imparting information to the Society in stimulating the interest of the many who improve several varieties through all parts of the province, and the benefits thereof.

Hoping that the Association will be fully working out its objects.
