Give me no furnace, dull and bare.
It's only sign of life, hot air!
Nor steam heat, either, would I take,
Whose harsh pipes rattle men awake;
Nor natural gas, whose empty flame
Is ever treading on the same.
I want a wood fire, whose warm bulk
Knows no no man's twist and snarl
For me a coal fire, heated and cold,
Which I can poke when I get mad.

TO PREVENT IS BETTER THAN TO REPERT.—A little medicine in the shape of the wonderful pills which are known as Pameloe's Vegetable Pills administered at the proper time and with the directions adhered to often prevent a serious attack of sickness and prevent the necessity of going to the doctor. And were not prone to sigh
Because they set before us

New York Millionaires.

Only a few people reading advertisements of bankers and brokers, saying that money could be made through speculation, realize that the richest men in America have commenced life in a humble way and have made their fortune through stock exchange speculations.

Men like Jay Gould who worked as a dry goods clerk in a small town at \$10.00 a week up to his twentieth year, and commenced to operate with his small savings of \$200.00 in Wall Street left at his death 70 millions of dollars; Russell Sage who worked as a grocery boy at \$4.00 per week and whose present wealth is estimated at 100 millions of dollars is still operating the market, although 90 years of age, and so are thousands of others who are enjoying all the luxuries life can offer, which is due to their success in speculations.

To the above speculator the same opportunities are open to-day as to others in the past. The small capital which can be bought and sold is 10 shares on \$2 margin, making \$0 dollar.

Anybody interested as to how speculations are conducted can get information and market letter free of charge upon application by letter to,
