Dr. Borden's Report.

The year just closing has marked an important advance in the student attendance and in the material development of our Ladies' College. We have had a total registration for the year of 388. Of these 192 have been in residence and 196 have been day pupils. Library department, 207; oratory, 83; H. S. C., 91; the arts, 65, and music, 225. The largest attendance in the history of the college was reached this term when we had 192 in residence at the late Ladies' College. Concurrent with this exceptional attendance we have been able to enlarge our borders in time to meet this increased demand. Through the splendid request of the late Charles Hart, of Halifax, which \$80,000 was made available during the year for building purposes we have been able to erect the beautiful new college building which so decorates the classic mount. Thus the dream of years is now being realized. The first stage in the transformation of our Ladies' College from wood to stone has been passed and we will have a new and splendid building with the most up-to-date equipment in the province. We are confident that the new building will not only be a credit to our school but will also be a landmark in the history of our province.
