McNAMARAS ARE NOW IN STRIPES. Indianapolis, Dec. 10.—United States authorities, examining the records of the federal grand jury yesterday afternoon to get all that he knows relative to the manufacture and supply of nitroglycerine which was obtained by the McNamara brothers and possibly others. He has been in this city for several weeks and some time ago identified the two McNamara brothers and Orrie McNamara as the men who had purchased nitroglycerine at various times in the past seven years. It is believed that arrangements are being made in San Francisco to bring E. J. Clancy, first vice-president of the International Association of Bridge and Structural Iron Workers, to Los Angeles to testify on Tuesday. Clancy was served with a subpoena in San Francisco yesterday, and at that time it was reported that his physical condition would not allow his removal here at this time. It is said that Clancy will be brought here on a stretcher if necessary.

BODILY INTERESTS

(Toronto Globe.) The parliament of Canada was warned the other day by W. F. Maclean that if inequalities in life caused by injustices in law and in its administration will produce anarchy in Canada similar to the injustice which has come to pass in the United States and disturbed business conditions in the United States. As Hon. Dr. Pugsley remarked, the member for South York is sometimes right in his views, but not so exactly right when he saw the shadow of anarchy foretelling an inevitable event. There are marked differences between political institutions in Canada and in the United States which may delay disturbances or change their form, but similar causes will bring about effects so similar that there may be distinctions, but not real differences.

In both countries the causes of social and political upheaval are similar. Private interests grow big by reason of special privileges become arrogant and oppressive. Selfish privileged interests combine for mutual protection against public rights. Combined big interests in a new society lobby interfere with legislation and secure for themselves special privileges which are special wrongs and dangers to the public. When their stations and burdens become intolerable there comes a protest among suffering people. An unbridled protest against a public wrong grows in a free people into an outbreak. When that outbreak among the people becomes a popular movement politicians begin to take notice. When the people's cause becomes strong the politicians break with their party leaders. That is the history of political democracy in the United States. The signs are beginning to show as though that might be the history of political democracy in Canada.
