PLAIN FACTS ABOUT TUBERCULOSIS.

The following tract submitted by the Pennsylvania Society for the Prevention of Tuberculosis to the International Congress at Washington was awarded first prize and a gold medal.

Names.

Consumption, decline, debility, phthisis, hectic fever are some of its general names. It may affect particular parts of the body and then be called by special names, as scrofula, hydrocephalus or water on the brain, lumbar abscess, iliac abscess, ischio-rectal abscess, fistula-in-ano, white swelling, bone caries, Potts' disease or hunch-back, hip-joint disease and lupus.

Contagion.

Tuberculosis is a communicable disease caused by the tubercle bacillus, a minute vegetable organism. It is always contracted from another suffering from the disease.

Colds.

It never comes from a cold, though a cold may first draw attention to it.
