

# JOHN DEERE ENGINE PLOWS

Four, Six, Eight, Ten or Fourteen Bottoms

Equipped with Deep Suck, Quick Detachable Shares. Handiest Feature ever put on an Engine Plow.

JOHN DEERE ENGINE GANGS were pulled by 10 Medal Winners out of a possible 13 in the 1911 Motor Contest.

### Use John Deere Engine Plows

Because these plows have the longest successful field record back of them, and more of them are in use than of any other make, which is the best evidence of their efficiency.

Because it is a safe bet that farmers generally will not buy an implement unless it has been proven satisfactory.

JOHN DEERE ENGINE PLOWS are very strong, pull easy, handle easy and do the finest kind of work.

They are strong because of the high grade material used.

They pull easy because JOHN DEERE bottoms are light in draft.

They handle easy because there is only one lever for each pair of plows and every other desirable convenience is provided.

They do the finest work because the pulverizing and turning qualities of JOHN DEERE bottoms have never been equalled.

Nut off  
Eye Bolt

### Quick Detachable Shares are a Great Advantage

It takes a lot of valuable time to change shares on an ordinary engine plow.

JOHN DEERE ENGINE PLOWS are equipped with QUICK DETACHABLE SHARES which can be changed in one-fifth the time usually required for other makes.

Each share is removed by taking off one nut, which is easy to get at, instead of four nuts inconveniently located.

Illustrations below give you a good idea of this feature.

Another thing, the one eye bolt holds the share more securely than when bolted to frog in the old way.

Think of saving 80% of time ordinarily required to change shares. This means a lot—especially when in a hurry.
