

## 30 PERCHERONS

Also Shires, Hackneys and Clydes and 12 Percheron Mares (3, 2 and 1 year old) have just arrived with our new importation from Scotland, England and France, of high-class stallions and mares. Many of them prizewinners in their native lands. Bred by the best breeders. Percherons, blacks and grays, weighing 1,600 to 2,000 pounds. Shires at two years old weighing 1,700 pounds. Clydes, bays and blacks, 4 and 5 years old, weighing 1,800 to 2,000 pounds, bred by the best in Scotland. Our Hackneys are bays and chestnuts, combining size, quality and breeding that cannot be beaten. These horses can be seen at Toronto and London fairs, and all for sale at reasonable prices.

## GOSSIP.

The transient breeder is served by occasional advertising, but the substantial man who is making a business of breeding and has a first-class herd, needs an advertisement standing at all times, catching the eye of the man who is finally ready to buy what he needs and writes for information.

## CLOVER LEE SHORTHORNS.

The Clover Lee herd of Shorthorns, the property of Mr. R. H. Reid, of Pine River, Bruce County, Ont., a few miles from Ripley Station, were never in better fettle than just now. They are of the very thick-fleshed, good-doing kind, imported and home-bred, and are just the sort that the present-day demand calls for. The herd has lately been strengthened by the purchase of the two grandly-bred imported cows, Apple Pie, a Marchioness, one of the thick, good kind, and heavy in calf to the Roan Lady bull, Imp. Royal Champion. The other is Princess Alice 6th, by the Missie bull, Conqueror's Crown. She has a splendid red bull calf at foot, by King of Diamonds. In young stuff for immediate sale are two two-year-old heifers, a rare good pair, sired by the Miss Howe-bred bull, Pride of Huron, a grandson of Imp. Blue Ribbon, and both in calf to Imp. Golden Cross. These are show heifers. Another is a nine-months-old roan, a superior heifer, by Golden Cross (imp.), and out of a granddaughter of the great stock bull, Imp. Royal Sailor. Here are three heifers that should be soon picked up, as they will individually strengthen any herd. In young bulls is an eleven-months-old roan, out of a Duchess dam, and got by Imp. Golden Cross, a show calf all over, and the making of a herd-head. Then there are two others about fourteen months old each, one sired by Golden Cross (imp.), the other by Pride of Huron, out of big, thick, good-doing cows, a pair of big, growthy fellows that will certainly do good wherever they go. Besides these are younger ones from imported sire and dam; the whole a choice offering.

## TRADE TOPIC.

**TONIC FOR HEALTHY ANIMALS.**—This question is often raised among stock feeders when considering the use of stock foods. They ask the question, "Does a person in health need medicine?" If stock were fed for the same purpose that the human being is nourished, there would be no occasion for the use of medicinal tonics under ordinary conditions. People learn by experience the evil of over-eating, and endeavor to select foods most agreeable to digestion. Furthermore, an effort is made to consume only sufficient food to sustain life and repair waste. The aim is not to put on weight, and in many cases just the opposite result is hoped for, but if the cow, steer or hog would be given only sufficient food to sustain life and repair waste, no gain would be perceptible. The profit is derived from the food consumed in addition to that which is required to sustain life and repair tissue. The animal has not the opportunity of selecting the foods most suitable to its digestion. Medicinal stock tonics have a place in the economy of skillful feeding, and the stock preparations that contain ingredients tested and found valuable are being sought after. Dr. Hess Stock Food is the result of Dr. Hess' twenty years' experience in the study and practice of medicine, both human and veterinary. It contains the bitter tonics long known in medicine for improving the appetite and increasing the flow of juices necessary to assimilation; it furnishes the animal system with iron, nitrates of sodium and potassium, which assist in eliminating poisonous waste material from the system, and laxatives to regulate the bowels. If you have never used Dr. Hess Stock Food, write to Dr. Hess & Clark, Ashland, Ohio, U. S. A. If it fails to increase growth and milk production sufficient to pay for itself many times over, they are prepared to refund your money.
