What is the best way to finish a small cistern, dug in stiff clay? I hope to have a better one in a few years, so don't care to spend very much on this one.

J. E. K.

Ans.—Bricking it up in the ordinary way is the most economical and satisfactory plan we know of.

#### THREE-SEEDED MERCURY.

C. A., Middlesex Co., sends "a new weed on his farm" to be named, and requests directions for treatment, if it is known to be noxious.

The weed is *Acalypha Virginica*. Its common name, three-seeded mercury, is derived from the fact that in the lobed, usually reddish bract at the base of each leaf there is a small, somewhat top-shaped capsule containing three seeds, one in each lobe. This weed is common in damp thickets, and along sandy river shores in south-western Ontario. In damp, newly-cultivated ground, it sometimes springs up very thickly, but it disappears with drainage and cultivation.

Mr. Robert McEwen, of Byron, Ont., near London, who advertises Southdown sheep and collie dogs, made a very successful show of his sheep this fall at leading exhibitions, winning, with home-bred stock, at the Detroit, three firsts, one second and three thirds, and at the Western Fair, London, five firsts and three seconds.
