No gripe r pain, no headache and nausea hen you use Dr. Hamilton's Pills,they cure scientifically. ositively the best laxative known, 25c at all deal-

A little diluted acid-will remove egg stains from silver.

Dry buckwheat flour, rubbed thoroughly several times, Twill re move grease spots from the carpe

# Windsor's Great Industrial Awakening

The greatest industrial awakening in the history of Canada has just taken place in the Windsor District. The heretofore quiet County of Essex will soon be Ontario's greatest Industrial section, with Windsor as the heart of this manufacturing district. While western cities are praying in vain for factories, hundreds of industries are literally forcing themselves into and around Windsor,

Windsor is the nucleus of what in the near future will be one of Ontario's largest cities.

# 100 Industries Now in Windsor--- A New One Comes in Every Two Weeks

The number of industries that are locating in and around Windsor is attracting from the point of supply. the attention of investors from all over the country. They have found that Windsor possesses one of the best locations in Canada for the manufacture and distribution of and ferry with Detroit, a city of 600,000. goods. It has a deep water connection with the Atlantic Sea Ports of Montreal, Quebec and New York City, and with Port Arthur, Fort William and Duluth, at the head of the Electric System, as orders have just been given for the running of the wires from Great Lakes. Gigantic barges can haul both coal and fron into Windsor from the Chatham to Windsor.

Windsor is one of the best railroad centres in Canada. It is connected by tunnel

It has the cheapest natural gas in Canada, and it will soon have the Hydro-

The large number of industries coming into Windsor and the rapid expansion of the city has accentuated the great need of a high class restricted residence district where the city's fine homes could be erected without danger of encroachment by buildings and cheaper houses which would lower property values We have selected this fine old estate, Thornfield Place, as the site of the homes of the best citizens in Windsor, Sandwich, Ojibway, the "Steel City," Walkerville, etc. We are developing this property and have placed it on such restrictions which we believe will enhance its value and encourage quick building.

# No Property in or Near Windsor Offers a Better Homesite or Investment Opportunity Than

Windsor's Most Beautiful Residence District

The charming situation of Thornfield Place makes this one of the most desirable of residential properties, it runs back from the river, and commands a fine view of both the Detroit River and the city on the other side.

Thornfield Place is the boundary between Windsor and Sandwich, and is on the

Electric Car line running to Amherstburg. It is only one and a quarter miles from the Windsor Post Office and the Detroit Post Office, and is much less than that from the centre of Sandwich.

A beautiful wide macadamized boulevard will run through the property from en to end. This will be Partington Avenue, and will connect the London and Tecumseh roads. Thornfield Place, when completed and built up, will be practically one long. beautiful avenue of the best homes to be found in the Windsor district.

The restrictions are such as to make this property the most sought after as a homesite sub-division of any in the county.

# The U.S. Steel Corporation Locating Near Windsor INITIAL EXPENDITURE \$20,000,000.00

This giant concern is to build their Canadian plant a short distance from Windsor. They have already purchased 1650 acres of land. They incorporated their property as the town of Ojibway, under a special act of the Ontario Legislature.

Judge Gary, the Chairman of the Board of Directors of the U. S. Steel Corporation, made a public statement in New York at the end of last year, saving that they would erect blast furnaces and several mills on the property which they had already purchased near Windsor.

The choice of the Corporation was no doubt decided by Windsor's unexcelled location, which is the logical shipping point, both by rail and water, to all parts of Canada and the United States. Its location is proving to be Windsor's greatest asset, and consequently industries are coming in faster than to any other city of its size. Its record for the past year and a half has been one new industry every two weeks.

The initial expenditure of the Steel Corporation alone is \$20,000,000.00 in the Windsor district. This means a tremendous impetus to business in Windsor and the surrounding country and the influx of thousands of employees, who will need homes. Since the decision of the Steel Company to build near Windsor, a great many American manufacturers, especially those of steel products, have secured locations in and around Windsor.

A thousand homes are needed in Windsor immediately. Thousands of people employed in Windsor are obliged to go to the expense of crossing the river night and morning, as they are unable to secure houses in Windsor. The supply of houses is not keeping pace with the demand. Windsor residence property is the best investment obtainable, and one that will show the quickest and largest results

## Windsor Investments Now is the Time to Make Money in

The big returns on real estate investments have always been made by Pittsburgh of Canada, and you have the opportunity now of getting in at the those who bought their property before the big rise in value. The rise of birth of a great city whose growth will outshine that of many of our western Windsor real estate is just commencing. Windsor is rapidly becoming the cities.
