A Savannah, Ga., despatch says: The full account of the Tatnall county cannibe affair 18 as follows: A few days ago som of the colored people in the lower end of the county held a picuic. They had engaged as cook and general overseer of the culinary department an old negro woman. Great preparations had been made for the festivi-ties and the sport ran high. It was a hungry band that gathered for dinner and awaited the summons. It was served as last, and the merry-makers fell to with will. Hardly had the edibles begun to dis appear, when a strange huch fell upon the boisterous group; one had been served to a piece of meat that clung to a small-jointed boue. It did not look like anything he had ever seen come from a fryingpan before and he showed it his neighbor. The other ooked at it attentively for a moment It is the finger of a child," he said.

There was a sensation which quickly spread into a panic. A hasty examination of other plates was made. More flugers were found, and pieces of meat that were evidently human flesh were held upon forks and gazed as by the Low thorouguly excited negroes. They ke z.d at each other in a frightened way, and then there was a simultaneous break for the cabin, in which the cook had prepared the meal. She met them at the door, brandishing a large knife. A wild light—like that of a minus regleamed from her eyes. The cowd pansed as the knife was flourished over their heads, all but one, a woman, who rushed forward with a strick, "My child; what have you done with my child?" There was no answer from the old cook. I left it here in ber charge," cried the excised mother, appealing to the friends about her. "Where is my child? Sue has killed it." Wash fiendish yells the dusky army, fired by, her agonizing cries, bore down upon the cook and in spite of her frantic struggles to ethe knife from her grasp. Evidence of the murder were about them, there was blood on the floor and the table was smeared with it. The living child was not here to be seen, but in its place was a portion of a little human body which had been taken from the oven. Pieces of flesh had been carred from it. The excitement among the searchers waof the wildest kind. They tore everything
to pieces in the cabin in their fury. It waplain enough that the old woman had
nurdered the child there, and had cooked half of the body. Where was the other half? There were drops of blood across the floor. Some one, less excited than the the floor. Some one, to the control of the control and the freezied shouts rang through the ment in briting about a "new reign of trees. Some suggested lynching, but there was no roje. Others wanted to hack her the Dake's book. The military demonstrates with the same knift that took the in pieces with the same knife that took the ife of the little child. Still another cried last ye Burn her!" and the cry was taken up violent and repeated until all in the exorted crowd were crying "Burn ber! burn ber!" She fought like a wild beast. She crouched, and struggled, and used her teeth and hands. But her capters were too many to cope with specessfully, and she was led out to the slaughter koding and shricking. They dragged her to a tree and bound her slightly to it. Then they heaped brush around her and fired it in a degen places. A circle of fire surrounded her, and from

AT LEAST THE DUKE SAYS SO A London cable says: The difficulty wish the crofters at Tiree is assuming an acute shape. Military preparations are being made to reduce the island to obedi ence. Mr. MucFarlane, the crofter-mem ber who was defeated at the late elections this morning attacks the Dake of Argyll s this morning attacks the Dake of Argyll as responsible for the trouble at Three, by consolidating small holdings into great farms, thereby doing great is justice to the danders. The Duke has written a brief lotter, which will appear in the Times to morrow, plumply contradicting the assertion of Mr. MacFerlane. The Duke authorizes the statement that the present trouble is due to the determination of the landlerd of Tires to protect one of the landlord of Tires to protect one of the tenants, recensive a crofter, against boycot-ting by the local Land League. The Dake states that this crofter is able

command capital enough to enable him to take over scook and cuitivate a small dairy farm. The farm was held by a family now settled in Australia and doing well. The girl of this family wished to take the farm last year. Say had so much sense that the Duke directed the farm to be tes to her, but her brother, an engineer from New Zsaland, persuaded her that she would do better there. She went, leaving the farm vacant. The crofter referred to the farm vacant. The crofter referred to desired to improve his condition and family by taking it. He was the brother of the late President of the local Free Land League. The members of the Land League on incensed at this step, which they regarded as likely to encourage landlordism, that they ordered a boyoot and sent streating letters to the crofter and the Duke's agent, whose life for some time was in danger. Furthermore they displaced from position the President of the Land League a brother crofter, and insisted that the land should be broken up into small and inadequate holdings again. It is the convection nuate holdings again. It is the conviction of the Dake that the local Land League wishes to prevent anything like prosperous development to the tenants in Tiree, the ope being common with Land Leagues in reland and of similar organizations

shroughout Scotland to attack the principle of landlordism.

The Dake does not expect there will be any serious attempt at armed resistance to the military force the Liberal Government has despatched to restore order. As an illustration in regard to the condition to which the island has been reduced, in the Duke's opinion, by the operation of the Land Lesgue, he cites the case of two policemen, who being driven out of the teland a few days ago, found themselves on when they arrested as soon as the main-land was reached, the reason being not of any particular connection with the up-rising of the crofters, but charged with-

strations made against the orofters last year, while it put a stop upon vident ou'rages, has not been so followed up by strict and impartial administration as to secure the regula operation of authority on that island, consequently the poor rates have not been paid over in a great part of Skye, and recently it has been found necessary for the local bankers and proprietors to advance money to carry on the p or houses, in order to proteer paupers from actual starvation, while many of the schoolmasters through out the island have not received their A circle of fire surrounded her, and from the mids of it she begged for mercy one moment and shrieked her imprecations the next; and around her stood the exotted negroes watching the flames as they scorohed her flash and seized upon her clothing and enveloped her in a sheet of fire. A Milkman's Last Round. A Chicago despatch says : A milk waggor with a corpe in the driver's seat, holding the reins, was the ghastly sensation t which the residents of West Twelftu street were treated this morning. Samuel D Newton, residing at No. 44 Ruble street had delivered milk to the bousewives a'on this street for years. His horse and care became familiar objects as he daily drove from door to door in the early morning. The horse knew the route as well as hi master. The surprise, therefore, was great this morning when the horse would stop at old places but no master would descend from his perch, and the old horse, too, seemed surprised, for, after remaining a few moments near the curb without seeing

is driver, he would stars off again.

An officer who was familiar with Newton and his cart noticed that something was wrong and investigated. He halloced to Samuel without the least attention being paid to him. Coming alongside the horse he stopped him. There sat Samuel, as usual, lines in hand and looking straight shead. The eyes were open and the face pale. Thinking the man was sick, the officer shook him, and he fell backward among his cans. Ho was dead, having passed away quietly while going over the route he had travelled for years. The body was laid out at the morgue. H disease is the supposed cause of death. Heart

Operating an Organ by Electricity. The new organ now being constructed in Janterbury Cathedral by Messrs. Willis will be, when completed in every way worthy of the grand old edifice, of which is is to form a most important part. The entire instrument will be operated by electricity, the upply being derived from a battery which is being placed in the old Singing School. Some idea of the wondrous properties of the new instrument may be gathered from the fact that the length of the cables conducting the electric currents average 120 feet from the console (or keyboard to the pneumatic levers operating the valves of the sound boards. The organist will occupy a raised position in the second arch of the south aisle, just over the spot where the old instrument was played, his manipulation of the keys being fished by means of the electricity through the 120 feet of cable to the action of the iestrument in the triforium above. The organ will be blown by four men in the old Singing School. The whole of the ratents employed in the pneumatic and electric action are the inventions of Messrs Willis, who are affording good evidence of their intention to thoroughly sustain their world, wide reputation in the work upon which they are now engaged.—Electrical Revi.w.

A verdict of " Not proven " in Scotland has the same practical effect as a verdict of "Not guilty" in England, and in Sootland, too, for that matter; that is, it ibborates the accused, who cannot be put on trial again, even though new evidence sufficient to onvot him should afterwards come to light. In a great many cases a verdict of "Not proven" is equivalent to one of "Not guilty, but don't do it again."

Outside of the gates of Teheran is the race-course, the longer circuit of which is about five miles. Only one meeting is held each twelvements, and is is at the beginning of the month, and it is at the beginning of the Perrian New Year, the opening of spring. Arabians, Turcomans, and a cross between the Cossack and Turcoman compete, and the chief race is five circuits, or about twenty-one miles. Mr. Schierbrand saw the distance run in 27 minutes 47 seconds. Either the time taken was not correct, or the winner was a wonderfully good horse. The purses were of gold and siver coins, tied up in little bags, which were pitched to the successful jokeys, who caught them in their turbans. No entrance fee is charged to the races, and no betting system is carried out. About two-hundred thousand persons cheered the contestants, the walls of the city being dense with people. The outer wells overlook the course, and from them the spectator gets a grand view of the horses. The Shah witnesses the sport from a pavilion, as do also his officers and members of the different legations. The jockeys are mainly boys, but sometimes a heavy weight, a full grown man, acts as pilot.
