Let Me be Your Baker?

Butter-Nut Home-Made Boston Brown

E. A. Mounteer,

3 King St. Residences for Sale...

Three thoroughly modern King St. residences have been placed in my hands for sale as follows:—

1 The Massey residence on North Side of King West, beautiful grounds, fruit and shrubbery that would take fifteen years to reproduce. Price \$4,000 Terms to suit.

2 New modern residence, hot water heating and thoroughly modern, now occupied by ex-Banker Thomas Price \$3,500 for immediate sale—\$300 less than its actual value.

3 Adjoining house to No. 2 on South King, also modern, leased at four years to pay 8 per cent. on. Price asked \$4,000.

All of above are snaps. For full particulars see or write

WALTER MILLS RETURNS HOME

Interesting Account Of A Pleasant Visit To Northern Ontario

A PROFITABLE HOLIDAY

Mr. Walter Mills, barrister, Hidge-town, son of the late Hon. David Mills, returned on Saturday from a trip through the Abitibi country. To a reporter of the Toronto News he made the following observations concerning that new and partly discovered district:—

"We started out the 4th of August. When I first sat in a canoe I trembled; I tried to see how deep was the water and how far it was from shore should I have to swim. After the second day out I paddled some, and after that I was well broken in. At the end of a week the canoe seemed the only boat a man should ride the river with. Well used to it, it is the nearest to being on the wing of anything I know. It seems to me now the way an office man should spend his vacation; he has to work and get rid of the useless fat which a sedentary life necessarily puts on.

"At the end of steel we launched on Lake Sturgeon, and before noon we had crossed the height of land. Beyond this and until one reaches the McDougall chute the land varies from rocky to clay soil. The Black River, which we entered from the Little White Clay River, is a good stream for canoeing, and there are plenty of fish.

ON THE ABITIBI.

"We entered the Abitibi from the Black River. The Abitibi is a wide and even water until few miles from confluence of the Frederick House River. Here we encountered the Dried-deer rapids, and the Long Sault rapids, which we were able to shoot, although pretty wild looking and more or less dangerous. But our guide was a good canoeist. All along the Abitibi River one is impressed by the splendid quality of the timber. The spruce, balsam, poplar, white birch and Balm of Gilead are of luxurious growth. Spruce is excellent, would make good standard logs. Poplar is much better than about Lake Huron; it grows 40 to 50 feet, straight and of fair size. I used to think it would be a hardship for a man to go up to that country without aid to carve out a home, but any ambitious man can take up a homestead, and build himself a house in a month or two, have plenty of game about him, and with a fair cache of supplies can do well. Moose are very plentiful. Their footprints are all along the shores, and they cannot keep out of your way.

MARKS OF RICHES.

"At Iroquois Falls I was shown claims which had been staked, bearing the marks of riches underground. Gold and copper seem to be indicated. This is 20 miles north of McDougall's chute. On the Black River we portaged over two water falls, besides the one at McDougall's chute. These waterfalls are sufficient for good water power for milling operations.

"The Iroquois Falls are divided in three, two of them with heavy volumes of water with 25 feet fall, and are a beautiful sight.

"On the hillside to the left of the river, near the Noyah's Falls, is a lone grave, with an oak slab bearing the inscription: 'Sacred to the memory of Joseph Thomas Bedds, who departed this life the 15th day of July, 1880, aged 18 years and 5 months.' The script is in the Spencerian style, and as good apparently as when done, nearly 60 years ago.

WITH AN OLD PROSPECTOR.

"On the Nedarch House River, we met an old prospector at Midland Rapids. He had some sample of rock from a claim he had staked out far from that point.

"On the Night Hawk Lake are numerous islands of solid rock rising up out of the water. They look like bronze. You may stand on any of them and count upwards of 50 more within the range of the eye. The Matachewan Falls are 40 feet high, and offer a great power. The Hudson Bay Company's fort is three miles below on the east side of the Montreal River.

"We were rescued from the foot of the falls by Indians from this fort after we had tramped three days through the woods of the unsurveyed district from west of Mount Sinclair without food.

"The tramp through thick forest where it is difficult to see sometimes more than 20 or 30 feet ahead, is good experience for a tenderfoot. It makes a fellow think of home a hundred ways he never thought of before.

MINERALIZED ROCKS.

"Three of our party had to refit ourselves with clothing at the fort. It was done at a very reasonable cost. About 30 Indians were camped on the grounds about the fort, which was made the more picturesque spectacle thereby. The Montreal River is a beautiful stream, very rocky shores most of the way down. Rocks seem to be mineralized. Badly so. Some samples from Matachewan showed iron of 11 to 20 per cent., and no doubt there are better—but we were not prospecting—we were reducing superfluous flesh, and raising muscle."

LONG CANOE TRIP.

"We went by canoe over a strip of water that was more than 500 miles in length. We were as far north of Lake Huron as North Bay is north of Toronto. We saw every kind of fall, timber and rock that lies in North Ontario.

"The soil is a rich clay loam and suitable for grazing and grain when made fit for cultivation by the removal of timber. One thing occurred to me, and that was the need for encouragement for the pioneer farmer by allowing him to take 320 acres of land instead of 160 as at present. The timber is valuable, but it will be a generation at least before he can put it in the market. But the day cannot be far distant when the north should be alive with the activity of men building homes as good as any in Old Ontario. Fifty years ago the country of Lambton was a swamp. The north land has many advantages over many of the population sections of Old Ontario in the inherent qualities of the soil.

"From Latchford north to within a few miles of James Bay, a few years ago was one of the greatest farming, mining and lumber countries ever opened up in the world."

Accompanying Mr. Mills were Mr. J. Russell Coutts, Chicago; Mr. Geo. Jackson, of the Gutta Percha Rubber Company's works, and Mr. George Thompson, steward of McMaster University. Mr. Coutts lost all his personal effects in the fire at Haliburton.

There May Be Survivors.

Winnipeg, Sept. 1.—A party of three have gone out on the steamer City of Selkirk to search the shores of Swampy Island for possible survivors, or for bodies of drowned, which may have been washed ashore from the wreck of the steamer Princess. It is considered possible that Capt. Hawes and the two girls may have clung to the deckhouse when it was swept off the sinking steamer.

Fifteen Building Burned.

Greenville, Maine, Sept. 1.—Fifteen buildings of this town were burned yesterday, including the Oxford House, a three-story wooden structure, with accommodations for 250 persons, 12 residences, a store and an unoccupied hotel, by a fire which started from sparks on the roof of the Oxford House. The loss was estimated at \$30,000.

BAD NEWS FROM CUBA

The Situation Has Assumed A Most Gloomy Hue

A SANTIAGO UPRISING

Havana, Sept. 1.—The situation was far darker last night than at any previous time since the insurrection broke out. News of an uprising in Santiago Province is causing the greatest concern. When Mr. Sheper, the American charge d'affaires here, was told the contents of the Associated Press Santiago despatch, he endeavored to verify it through the State Department, but was told it was absolutely untrue. Subsequently the despatch was verified from private sources, and from newspaper sources. It is the opinion here that the worst calamity of all to the Palma Government would be an insurrection in Eastern Cuba.

The Associated Press was informed last night by two reliable eye-witnesses that Cardenas, which hitherto has been considered a perfectly peaceful city, was the scene Thursday of desultory fighting between the police and rural guards on the one side and roving insurgents on the other.

The only province remaining peaceful is Porto Principe. The Associated Press correspondent at Cienfuegos telegraphed last night that there are 3,000 armed insurgents in that vicinity and that all the towns in Santa Clara Province are controlled by insurgents. The attack and loot trains and seize the property of foreigners as well as of Cubans.

Trinidad is surrounded by insurgents, and the Government appears powerless to protect the property of Americans and other foreigners. Railway trains are held up at will and passengers searched. The Cuban Central Railway has declined to assume responsibility for the safety of passengers.

Want 5,000 Chinese In Free.

Montreal, Sept. 1.—J. G. H. Bergeron, M. P. for Beauharnois, who returned yesterday from the Pacific Coast, says that leading Chinese residents out there are getting up a petition, asking the Dominion Government to allow 5,000 Chinese to enter Canada without paying the head tax. The idea is to employ these men in the mountain section of the Grand Trunk Pacific, the Celestials to return home at the completion of the enterprise.

England Sunburned.

London, Sept. 1.—The last day of August broke all heat records in this country. The official instruments at 2 p. m. yesterday registered 91 degrees in the shade and 129 in the sun. A number of heat prostrations in the streets were reported.

A WHEAT MARKET

Governor-General Advises Canadians to Look to Orient For It.

Prince Albert, Sask., Sept. 1.—Replying to the civic address of welcome, Earl Grey took occasion to extend several wise suggestions to western agriculturists, chief among which was that they should endeavor to cultivate the Oriental market with its great possibilities.

His Excellency said that as he rode through the golden wheat fields and over the green prairie only waiting the plough and the seed wheat, he began to wonder where all this prosperity was going to end.

As Governor-General, it was not for him to take a part in controversial matters, but it was his duty to take a far-seeing view and looking into the future he saw coming a time when the present market for Canadian wheat, which was chiefly Great Britain, would not provide a demand equal to the supply.

One remedy for this would be to adopt mixed farming, but he thought the most important step which could be taken by Canadian farmers would be to try to secure the Oriental market to sell their wheat to the Japanese, who were now in a state of transition from a rice-eating to a wheat-eating nation.
