

# MOTORS AND MOTORING: A Page Full of Interest to the Owner or Prospective Owner of an Automobile.

## CLEAN UP THE LITTER

"Park your car anywhere you wish, but clean up your litter afterwards." Keep this in mind now that the jaunting season is beginning.

This advice ought to be posted, according to thoughtful motorists, at many points along the country roads and especially at the hundreds of pleasant little vantage points where family motoring parties are in the habit of stopping for lunch. A cool and inviting bit of shade, a spring by the roadside, or a slightly spot overlooking a sheet of water—these are the places sought in summer by the touring parties, and when the ideal bit of ground has been reached, out come the food hamper and the sandwiches, and all too frequently the scraps of wax paper and the ice-cream boxes and the other essentials that mother has been thoughtful enough to put in are left lying about, to be scattered by the wind or trampled into the ground.

One of the pleasantest things about the motor picnic is to find the lunching place scrupulously clean, and one of the most disappointing is to find it untidy. Could not every party make it a point to clean up after the repast, and so have things in tidy shape for the next? To do this, says a writer in Country Life, would remove what is called "one of the motorists' gravest disregards for his fellowmen."

Several of the 1922 models of passenger automobiles have a light placed under the hood, for inspecting the engine on a dark night.

## DEGREE OF HONOR FOR DANISH DRIVERS

A degree of honor is instituted for chauffeurs in the service of the Royal Danish Automobile Club in Copenhagen. This consists of a diploma and a badge of honor for men who have loyally and ably served a certain number of years. The proceeds of a fund reward deeds of valor and presence of mind exercised on difficult occasions in automobile accidents, and also to support widows of deserving men.

## DRESSING FOR LEATHER

An effective leather dressing is made with one part vinegar to two parts linseed oil shaken vigorously in a bottle. This dressing should be gently rubbed into the leather with a rag. Then rub with a soft duster and finish the polishing process with a chamois leather.

The treatment may be applied to leather upholstery, suit-cases, trunks and bags of all descriptions. Not only will it render the leather pliable, but it will make it look like new. When the leather shows signs of wear, white of egg should be painted on the worn part some days before applying the linseed oil and vinegar.

## HORACE'S PUNISHMENT

Little Horace was sent to his room as a punishment for taking forbidden cake from the sideboard cupboard. His mother, thinking to make the punishment more impressive, went up to his room, and after all was forgiven, said:

"Now, Horace, what did I punish you for?" Horace looked at her in amazement, and his face wore a pained expression. "Well, mummie," he replied, "I like that! Here have I been kept in bed all the afternoon, and now you can't remember what you did it for!"

Advertising offers a rich field for the man in whom a trained imagination and sound common sense will work in the same harness.

## Mail Contract

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday, the 2nd June, for the conveyance of His Majesty's Mails, six times per week over GREENWICH No. 1 R. M. ROUTE under a proposed contract for a period not exceeding four years, dating from the 1st October next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the terminal and route Post Offices, and at the office of the undersigned:

W. E. MACLELLAN,  
Acting District Superintendent,  
DISTRICT SUPERINTENDENT'S OFFICE,  
Halifax, April 18th, 1922.

## PRESSURE FEED FAILURE

It sometimes happens on cars where fuel is fed by pressure supplied by the exhaust gases, it becomes increasingly difficult to maintain the pressure at the requisite figure. As a rule pressure does not drop quickly, but seems gradually to ooze away. The first thing to do in a case of this kind is to examine the filter cap of the tank. A leather or rubber gasket is used at this point and often the rubber becomes spongy or the leather gets hard and cakes, or a small bit of foreign matter may have lodged between the cap and its seat. On the other hand it sometimes occurs that the pressure in the system is built up to a point where the small valve operated at the carburetor float will be unable to restrain the fuel and flooding of the instrument will result. As a rule, a pressure of one and a half pounds is ample to insure an uninterrupted supply of fuel in the carburetor.

## MOST WANT ENDURANCE

A census conducted by the National Automobile Chamber of Commerce shows that endurance is what most automobile owners seek in a car. Other considerations in order of preference are: Economy, comfort, price, appearance, service, hill-climbing ability, specifications, speed and appointments.

## PROPER WAY TO STOP

Skidding or locking the brakes and sliding the wheels causes serious damage both to the truck's mechanism and the treads of the tires. Drivers should be taught that their trucks will stop quicker if the brakes are applied gradually and firmly than with a jerk. Improperly adjusted brakes will sometimes cause one wheel to lock, resulting in a section of the tire being torn or ground off. As soon as a truck starts to skid it should be steered, if possible, in the direction of the skid. Abrupt turning of corners has the same effect as skidding by increasing the strain and wear on the tires.

In France, a regular motor service is maintained daily over the new "Routes des Alpes", between Nice on the Mediterranean shore and the Swiss frontier, travelling the French Alps and traversing some of the wonderful mountain country in Europe.

Because of automobile stealing, a large insurance company is said to have lost \$2,000,000 in payment last year of cars insured against theft. Losses during 1920 amounted to \$1,000,000.

**Everybody knows**

## Templeton's Rheumatic Capsules

Sold than all other Rheumatic Remedies combined for Rheumatism, Neuritis, Neuralgia, Sciatica, Lumbago, etc.

Many doctors prescribe them, most druggists sell them. Write for free trial to Templeton, Toronto.

Sold by A. V. RAND

## FAULTY MAGNETO GROUND WIRES KEEP ENGINE RUNNING

If an engine with magneto ignition continues to run after the ignition is switched off, the trouble lies in the magneto ground wire, which may be disconnected, loose or broken. Sometimes a break in the wire may be unnoticed because the insulation around the wire may not be damaged.

## CARBURETOR MUST BE ADJUSTED WHILE HOT

A great many car owners make the mistake of adjusting the carburetor when the engine is cold. Now it is always best to make adjustments to the motor after it has been run for long enough to get thoroughly warmed through, and this applies equally to the valve tappets, etc. It is quite possible that the cold motor may operate very well on certain adjustments that will not agree at all with the hot engine.

Back-firing is the principle cause of automobile fires, and the principal cause of back-firing is too lean a mixture fed to the cylinders.

Minard's Liniment used by Physicians.

## USE RUBBER COVER ON SHORT CIRCUIT

There is frequently danger of short circuits in the battery because of the fact that one of the terminals is located near the metal handle used for lifting the battery. To obviate this danger it is only necessary to slip a short length of rubber tubing over the wire at the point where the contact might be made. To do this the tubing should be slit lengthwise, slipped over the wire and taped firmly in place. It is a good plan to follow this practise wherever there is danger of the wires rubbing off their insulation, establishing a short circuit.

## BWARE REJUVENATOR

So-called battery "rejuvenators" do restore a battery's strength—for a while. But at the expense of the battery. They shorten the life of the battery plates. The best way is recharging by electricity.

# THIS WILL BE ANOTHER Studebaker Year

Its the car everybody wants because it is the best.

The unusual popularity of STUDEBAKER CARS is attested by the fact that the corporation enjoyed the biggest business in its history in 1921.

Notwithstanding the fact that the total number of all automobiles sold (except Ford) was 40 per cent. less than in 1920, the total aggregate of sales for the Studebaker cars was 20 per cent. greater than in 1920—and in Canada 64 per cent. greater than in 1920.

## QUALITY COUNTS!

Get into the procession and drive a Studebaker in 1922.

Full information on application. Let us tell you about the Studebaker.
