Beerbehm's Corn Trade List, of the 30th ult nomments on the above estimates as follows:—

It can only be remarked that the figures adopt in this estimate are, as far as respects the principal items, namely, the requirements of the United Kingdom and of France, in accordance with the most accredited estimates that are now current, and that, for the rest, the statement appears to have been made with a prudent view to rather underestimate the probable requirements of some of the other countries; thus, Belgium is assumed to require only 515,000 qrs, and Holland 620,000 qrs, which figures are likely to be rather below the mark. It will presently be more easy to construct a tabular estimate with greater approach to accuracy, according to the further information to be gathered, and this subject will shortly be reverted to.

prices have declined generally. People have been generally exercising their brains to discover where bottom will be reached, but the majority now seem to have abandoned the solution of the problem as a hopeless task. Receipts have been low; loose has sold at \$7.50 to \$3, and sheaf at from \$9 to \$11; but discoloured sold to-day at \$7 to \$10. at \$7 to \$10.

Potators—Car lots of early rose sold last week at 60c, and have since been offered at that figure. Street receipts have been large and prices steady but unchanged at 65 to 75c per bag.

APLES—Have shown no change, being offered in very large quantities and selling as before at 75c to \$1.25 per barrel, the greater part going at 87½c to \$1. ncrease; but the great bulk of them consists of in-terior grades, and from these in particular buyers hold aloof. There has been a considerable increase during the week in stocks, which stood on Monday morning as follows:— Flour, 2,600 bbls; fall wheat, 57,332 bushels; spring wheat, 57,901 bushels; oats, 15,240 bushels; barley, 181,758 bushels; peas, 3,393 bushels. week : flour has shown a fall of 1s; the inside price has declined 1d and peas 3d on the week, and car-goes of No. 2 Chicago spring for shipment during next mouth, which were quoted on this day week at 37s 6d, had fallen on Monday to 36s per quarter. Both imports and home deliveries were large last week, and markets to-day are reported very dull and heavy. Receipts have continued to be much in excess of consumption. The total supply of wheat and flour 570,000 to 598,125 qrs vs 411,000 to 420,624 qrs weekly consumption, indicating a surplus in supply over consumption of 159,000 to 177,501 qrs. The supply of maize for the week was equal to 1,380,-consumption in 1877 of 1,261,124 bush vs. 1,390,774

a slight decrease and amounted to 1,475,000 grs

The consumption of bread might be expected to be below last year's in consequence of the potato crop being better; but this circumstance may be balanced by the low price of wheat encouraging its consumption. Continental advices by mail report dry weather and moderate temperature, with abundant supplies of new wheat in France. The crop, however, seemed to be defective in every respect, and the indifferent quality of the samples, as well as the numerous offers of foreign, prevented millers from throwing off that reserve with which they operated

Land Commissioner, Lansing, Mich.

FOR SALE—THE HIGHLY IM-"MAIZELAND,"

Comprising about 550 acres of land, including 60 acres of woods, mostly oak and hickory of large growth. Maiseland, situated in the town of Red Hook, N. Y., about 90 miles from the City of New York, was for many years the residence of the late William Chamberlain, and is well known among leading agriculturists as one of the very finest farming properties in Dundees county. Handsome brick mansion, 50 by 40 feet, with large, irregular brick extension under same roof; furnace, hot and cold water, and all city conveniences excepting gas, having been the winter as well as the summer residence of the late owner; extensive piazzas; grounds handsomely laid out in lawns, plantations and shrubberies. Positively PREN FRON MALARIA.

Besides buildings appertaining to the mansion, such as coachman's house, gardener's house, conservatory, graperies, &c., &c., there are at convenient distances three very complete sets of farm buildings, each with good and comfortable farmer's dwelling-house; also three additional tenant houses and large summer sheep house. Has been a sheep farm for the past 30 years, and many of the buildings were erected especially for sheep raising, and are unusually well adapted for that purpose. The tarm is perfectly drained, and well watered by two never-failing brooks and numerous springs, wells and cisterns. Would sell the western portion, including wood land, two sets of buildings and two tenant houses, about 400 acres in all, at a very moderate price per acre. No exchange, but a large portion of the purchase money may remain on the property at 8 per cent. interest. The nearest station is Barrytown, on the Hudson River R. R., two miles distant. Will be glad to give any further information asked for, and will send for persons wishing to examine the property, if notified by mall or telegraph. WM. L. CHAMBERLAIN, Exect, 339-5
