For All Shoes

DRI-FOOT
Waterproofing

You do not need to wear heavy, uncomfortable rubbers if you treat your shoes with it. Dri-Foot is a liquid composition that waterproofs your shoes and gives them longer wear. It is invisible—does not prevent polishing, costs but a fraction as much as rubbers and one application lasts all season. Children's shoes as well as yours should be treated with Dri-Foot.

A FULL-SIZED-CAN FOR 25c.
We heartily recommend it.

Newfoundland Agricultural Board.

BULLETIN No. 2.

To District Agricultural Societies:

The Agricultural Board has ascertained that there are considerable stocks of potatoes held in the country over and above what will be required as seed for the coming season's crop. The Agricultural Board, however, thinks it desirable to warn Societies and individuals against the inducement that prevailing high prices will offer, and which might possibly conduce to the selling for food purposes of a portion of the quantities that could with much greater advantage be kept for seed.

Present indications point to the continuance of high prices for another year or longer, and therefore those holding stocks of potatoes can certainly derive a larger measure of profit therefrom by planting more largely than usual, and selling the product, than by selling all their potatoes for food purposes only, now or later in the season.

Your own interests and the Country's can best be conserved by each holder of potatoes first providing amply for his own seeding requirements and next by selling to others requiring seed, before disposing of any for consumption.

ALBERT J. BAYLY,
Acting Secretary.
