

MONTREAL RED MOUNTAIN

(COXEY)

Capital Stock \$1,000,000.

Treasury 340,000 Shares.

The Coxey is situated on Red Mountain at Rossland, adjoining the Jumbo mine, which is now under bond in England for \$500,000, and the Giant mine which is now shipping ore to the smelter. Development work is being pushed on continuously and assays as high as \$61.00 have been taken from the shafts and tunnel.

The shareholders include many of Montreal's most prominent men. The Company is controlled and managed from Montreal. Ample treasury has been provided for development work. We have no hesitation in pronouncing this one of the strongest and safest mining companies yet organized in Canada.

The first block of shares is now being sold at 12 cents and only a few thousand shares remain to be disposed of at this price. The price of the next block will be 15 cents. Orders should be sent in at once to obtain present price.

FOLEY MINE

Shares \$5.00 Each.

Present Price \$3.75.

The first two mill tests, which produced over \$3,000 in gold, proved that the ore in the Bonanza vein averaged over \$20.00 per ton. After deducting the cost of mining and milling, there would be a profit of at least \$15.00 per ton, in this great ore body. The third mill test produced \$1,650.00 in three days and the two gold bricks from this run have been on exhibition in the *Star* Office window at Montreal for several days. It is likely that this will be the next dividend payer among Canada's gold mines. After the limited number of shares that we now have on hand are sold, we believe that it will be impossible to purchase shares at any price. At present price this is one of the best investments in Canada to-day.

WAR EAGLE CONSOLIDATED

Capital \$2,000,000.

Treasury 350,000.

This consolidation of two great mines, viz:—The War Eagle and the Crown Point group at Rossland and the Richmond Group of Silver Claims in the Slocan, offers to the careful investor a splendid chance to make large profits without risk. The company is now in a position to pay dividends and will probably do so at an early date. As quotations are changing daily, it would be well to write or wire for price. We have a small block of these shares that we could dispose of at close prices.
