

CHAMBERLAIN'S BOVINE

After repeated antiseptic and stimulating surgical treatment (which affords no nourishment) will yield to BOVININE as to no other agent. After thorough cleansing, aspiration of peroxide of hydrogen, twenty-five per cent pyroxylic, saturating surface and edges of dead tissue, irrigate with merc. bichloride 1-1000, and dress. After twenty-four hours dress with Tiersch, washing part with serum, and in twenty-four to forty-eight hours remove, the wound being thoroughly aseptic. Again dress with sterilized gauze saturated with BOVININE, and change daily, removing any unhealthy granulation each day. This nourishing blood supply will be eagerly absorbed by the perishing embryonic tissue. Continue BOVININE saturation until process of healing is complete. It is thus easy to prove the certainty and power of topical blood nutrition. It abolishes pus, stench, and PAIN, and heals with magical rapidity and finality.

BOVININE

is live blood—the arterial blood of the sturdy bullock, prepared by the cold process. It is antiseptic and sterilized. Send for our "Handbook of Haematherapy," giving details of treatment in hundreds of clinical cases, surgical and otherwise.
