> A valumbe Renal Alteratice and Anti-Lithic agent of manked service in the trettment of Cystitis, Gout, Rheumatism, and diserses of the Uric Diathesis generetly.

# LAMBERT PHARMACAL COMPANY, ST. LOUIS. 

## INTEGRITY

Physicians are called upon almost daily to test the integrity of medicines Their prescriptions call for combinations that test the intelligence and integrity of the druggist. New preparations are presented for their judgment, and there is constant vigilance on the part of the roctor needed to maintain the high standard of even the remedics they prescribe.

We believe that the integrity of Soott's Enulsion of Cod-liver Oil and Hypophosphites is never doubted. We ourselves know that the high standard of our preparation is always maintaned, and we believe it justifies the confidence of physicians. There is no suhstitute for Scott's Emulsion in cases where Cod-liver Ois is indicated.

Physicians in their practice will tind Scott's Emulsion always the same. It does not separate or become rancid. The ideal combination of the finest Norway Cod-liver Oil, Hypophosphites and Glycerine is found in no other remedy, and the way children take it slows its palatability.

Physicians know better than we when Scott's Emulsion is needed. We merely clam to know better than anybody else how to make a perfect mechanical emulsion of Cod-liver Oil, and we have the best means for making such.

We hope physicians will purdon "world of cantion when we catl their attention to the growing cril of substitution. If Scott's Emulsion is prescrihed, Scoti's Emulsion, and not an inforior subsfitute, should be taken by the putient.
