

HOMESEEEKERS

You Don't Have to Irrigate in the Fraser Valley.

For eighteen years we have been selling land in the evergreen Fraser Valley, British Columbia. During that time we have sold thousands of acres of land and can point to hundreds of prosperous farmers and fruit growers who are our clients and our friends. We sold them good land at right prices and they are satisfied. We have made a record and are proud of it. We have a reputation for fair dealing and we must maintain it.

YOU ARE PROTECTED

in your dealings when you do business with us. We cannot afford to sell you anything but the best your money will buy.

With offices in Vancouver, New Westminster and Chilliwack we cover the whole of the fertile Fraser Valley and are in touch with all movements in fruit and farm lands whether large or small. You have at your command the full range of our accumulated knowledge gained after eighteen years' experience in the land business. We can intelligently advise you where to settle and what to buy.

Write for our profusely illustrated, 96-page book "The Fraser Valley."
