

PREFACE

CIIPS Working Papers are the result of research work in progress, often intended for later publication by the Institute or another publisher, and are regarded by CIIPS to be of immediate value for distribution in limited numbers--mostly to specialists in the field. Unlike all other Institute publications, these papers are published in the original language only.

The opinions contained in the papers are those of the authors and do not necessarily represent the views of the Institute and its Board of Directors.

Arnold Simon is a basic researcher with over twenty years experience, including several books and pamphlets to his credit. He is an engineer and was previously president of his own electronics manufacturing company.
