

Penzex Incorporated

P.O. Box 1215

Belleville, Ontario

Canada K8N 5E9

(613) 395-5467

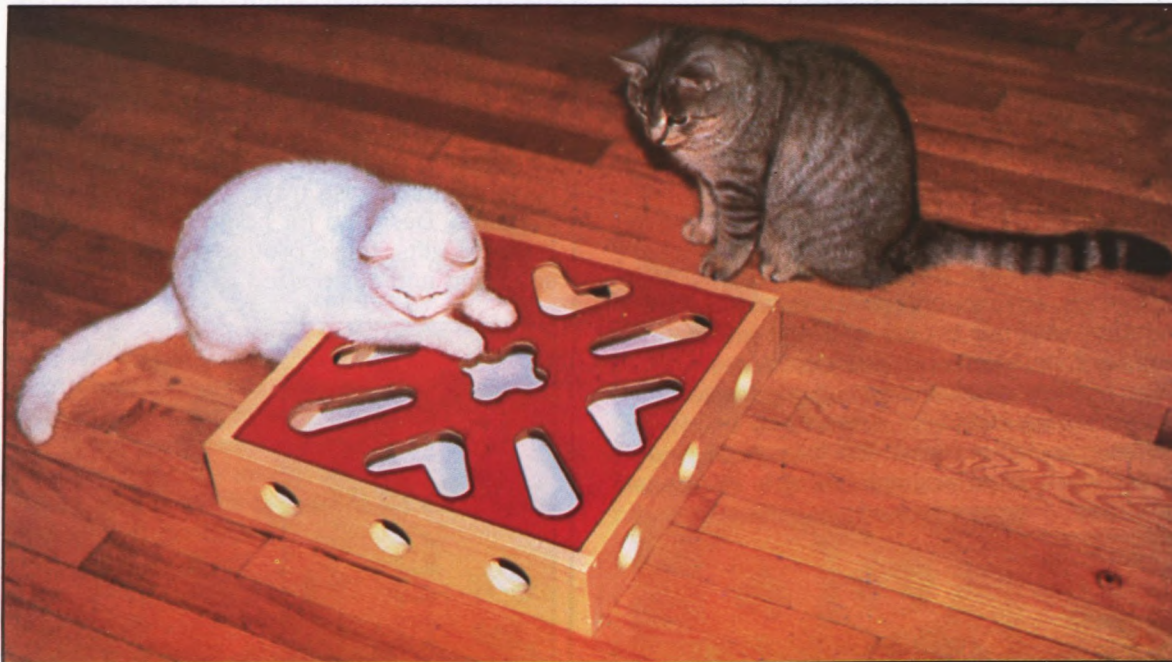

**Contact: Gordon Penziwal,
President**

Penzex is a relatively young but innovative company involved in the manufacture of pet products. Recently, we introduced a unique new item — CAT-A-COMBS — a game for cats!

Most cat toys on the market are notorious for getting lost under furniture or requiring some form of human participation. CAT-A-COMBS is different because cats can play

with it on their own. A favorite toy or ball is dropped inside the CAT-O-COMBS. The cat sees it through many openings and can swat and bat it about, but without the object getting out.

Its purrfect for apartment cats that never go outside; for active kittens; for older cats that need to stay in shape; or, for any cat during the winter. As a result of sales across North America, cats from all parts of the continent report that CAT-A-COMBS is the greatest invention since kitty litter.

Hours of fun and exercise for the family cat with a unique new pet product.

Vice-President**

The Print Mint was one of the first companies in North America to introduce the concept of laminating decorative prints on wood. We have been recognized as leaders in improving this technique, and our products are well known for their superior quality.

The attractive prints which we select for laminations create an eye-appealing product, representing an interesting and modern alternative to the more common, framed picture. Produced by pressure mounting techniques, laminations are far less expensive than frames and, in addition, they are fully washable, and guaranteed to provide a lifetime of pleasure.

Laminations are the art objects of today, and are sure to enhance the decor of any home or office.
