

Aid is also provided both directly for the holding of competitions at the national level and, through grants to the provinces, within the province and community.

Assistance is also provided to sports-governing bodies that qualify for and need it, through grants to assist in their administration.

Assistance to organizations concerned primarily with the non-competition aspects of sport and fitness activities is largely for extension and improvement of existing services and for fact-finding and research projects.

National and International Games

Federal as well as provincial and municipal assistance is given under the Programme to such projects as Winnipeg's holding of the 1967 Pan-American Games and the staging of the first Canadian Winter Games in Quebec City and environs in 1967.

GRANTS FOR TRAINING AND RESEARCH

Postgraduate Training

The Programme requires a constantly increasing number of professionally qualified physical and recreation educators. From the outset it has provided for aid to students in this field.

Three types of grants-in-aid for professional postgraduate study are provided. These are:

Postgraduate scholarships, for superior students working toward the master's and doctor's degrees in physical education and recreation;

postdoctorate research fellowships for persons holding doctorates in physical education, recreation or the biological sciences, who have already made significant contributions to fitness research and wish to pursue special investigations or studies designed to aid the Programme;

special fellowships for senior persons, to carry out administrative or other studies.

Postgraduate scholarships for study toward the master's degree provide up to \$2,000; toward a doctoral degree, up to \$2,000 a year for two years; toward postdoctoral fellowships, up to \$4,000 a year; and toward special fellowships, up to \$500 a month. In addition, travel allowances and, for doctoral awards, a \$500 dependent's allowance may be payable.
