### REVIVE CRITICISM LAST YEAR'S LOAN

Mistake in Being Non-Taxable-Point to Success of New

Flotation.

Special to The Toronto World. Ottawa, Nov. 17.-The success of the Victory Loan has revived the criticism of the non-taxable loan of last year. Without war stimulus, Canada this year subscribed for a taxable loan equal to that of last year, when the public was filled with a strong patriotic desire to emulate by contribution at home the splendid sacrifice of our army in the field.

believe that a grievous mistake was munication laid before York council made last year to secure a similar amount, and that the national reveamount, and that the national revenue will suffer thereby for a long time. How much was lost to the revenue by last year's non-taxable loan cannot be estimated with accuracy, but it is placed from a quarter of a million to half a million dellars annually by well-informed people. The success of the present loan makes next year's flotation a much easier matter. Dur. It is next year it was estimated by F. C. Boville, deputy minister of finance, that Canada would require to borrow from \$650, 000,000 to \$800,000,000. At most, next year's domestic loan should not extend to the work of installing the services, will come as a districted to the work of installing the services, will come as a districted to the work of installing the services, will come as a districted to the work of installing the services, will come as a districted. H. H. Couzens, general manager of the Toronto Hydro-Electric System, wrote that owil's to a shortage of linemen and a rush of work elsewhere, there would be considerable delay in getting services ordered by York township installed. The letter gave members of council an unpleasant surprise, and the solicitor was installing the services, will come as a districted with Rhodes Avenue Presbyterian Church, held in the school house recently. desire among industrial leaders in Canada that this office be reorganized and its commercial scope increased. For this purpose it is felt that one of Canada's industrial leaders should be appointed. At present the supervision of Canada's European trade is under Lloyd Harris' special trade mission, but there must be some permanent organization secured, and the most feasible method is the reorganization of the high commissioner's London office. Those mentioned for the position are Sir George E. Foster, Sir Charles Gordon and Lloyd Harris.

(Continued From Page 1.) cation of Mr. Nixon's job is behind a pleasant scene which presents itself to travelers to Muskoka over the road that takes Premier Drury home for Sunday, Approaching Orillia, you see on an eminence to the left, a fine brown brick building, set in-rich lawns and fruitful gardens. It belongs to you as much as it belongs to anyone else in the world. What is within its walls is s much your concern as anybody's. Inside that noble edifice and its annexes there sleep every night eleven hundred mentally defective sons and daughters of Ontario. Outside are scores—perhaps hundreds—more who cannot secure its shelter. "Mentally defective" is a toned phrase. The shorter description of the dwellers in the big house is "idiots." When you reflect that one building shelters the equivalent of a member of every fivendredth family in Ontario, and that they are your wards, do you want to go in and see so much and so appalling human misfortune? Significance of Joe Downey.

Here is a fact about the Home, which you may regard as a phenomenon. The superintendent of this institution is in his post because he was a politician. He is blithe Joe Downey, who used to sit in the legislature and was a newspaper man. Ask two questions: Why are there eleven hundred idiots at Orillia? Why is an ex-politician the superintendent of an asylum for those to whose mentality Answer those two questions and you have glimpsed something of the weight and complexity of the toil that has been thrust on young Mr. Nixon by the peculiar chances of an elec-tion campaign. At the moment, the prevalence of children who are born in darkness is regarded as part of the problem of mental disease which has placed over ten thousand adults in Ontario's hospitals for the insane—people who once were in as good mental health as the general run of cabinet ministers, but who have been

overtaken by the worst calamity that can befall human kind. Tragedy of Laurentian Fringe.
It is pitifully true that an excessive proportion of the Orillia inmates come from the sparsely-populated districts along the rocky edge of fer-tile Ontario—they are a final disaster of too rural a life. Parts of Muskoka and Frontenac and Hastings coun-ties, for example, should never have been settled. At the best, the settlers lumbering was open to them. always a travesty to call their hold-ings "farms." With deforestation, they which they are not to blame.

Once in a while some ghastly trag-edy happens in the black country, which makes South Ontario shudder, pools of degradation, for which, as we are members one of another, all Ontario is accountable.

Efficiency More Than Money.
When people, thru isolation, poverty, lack of education and openness the assaults of the Evil One, lose the traditional regard of prohibited degrees of consanguinity, the human breed descends to the pit. In connection with it various things are to be said which bear illuminatingly upon the difference between the administrations of W. J. Hanna and W. D. McPherson, and suggest the lines along which Dr. Nixon may serve his province and win for himself an enduning fame. In realizing that difference and turning it to public account, Dr. Nixon will see Joe Downey of Orillia and the Ontario doctors' trade union in an unexpected, and, for a time a heaftleexpected, and, for a time, a baffling
