PREDICTS MINERS WILL NOT STRIKE

British Labor Member Believes Men Will Win Out in Any Case.

Ben C. Spoor, M.P., who will address the Canadian Club on Tuesday next, is on his way to India specially to represent the British Labor party in order to find out how the new government of India bill is working. He will also attend the World Brotherhood convention in Washington. Mr. Spoor, who is somewhat of a capitalist, was the unanimous choice of the miners of Bishop Auckland to run for the British house of commons. He triumphed over Liberal and coalition candidates, being elected over the former by over three thousand. "I do not think that there will be a strike," said Mr. Spoor yesterday. "I believe that the government will come a long way to meet the miners' demands. Personally, I regard these demands as quite legitimate, but the question cannot be viewed apart from the general situation in the mining world, caused by the government's failure to adopt nationalization as recommended by Justice Sankey last year.

When the coal commission was established we were given to understand that whatever was recommended would be adopted as the government policy. That was not done, and the result is, not only the miners, but that growing section of the community that sees in nationalization the only solution of the present difficulty, feel that the government has not acted squarely. This created a temper that has to be remembered when viewing the question of immediate demands. "Ultimately the miners will win," added Mr. Spoor. "As Frank Hodges pointed out in his book on nationalization, sooner or later the miners will get everything they ask for, for this simple reason—the community will give them anything rather than go down into the pit and get the coal themselves. So far as the miners are concerned, they have not yet reached the point recommended by Justice Sankey. He contended that the pre-war rates were totally inadequate and that there should be a substantial increase. Speaking roughly their wages have advanced during the war pretty much on the same percentage as the cost of living had increased, so that relatively they are no better off."

OBJECTS TO DICTATION. "I am not saying that I am opposed to the early closing bylaw," stated Magistrate Ellis yesterday, "but what I do object to is that anyone should come into the court and say: 'You should have fined so and so more than you did. You fined him only \$1; you should have fined him \$10.'"

PROCLAMATION FIXES FIRE PREVENTION DAY

By royal proclamation, the government of Canada has designated Oct. 9 as fire prevention day, when lessons on fire prevention will be given in every school, and public meetings will be held in many cities, towns and villages. Owners of property and occupants will be counselled to give special attention to the removal of fire hazards from their premises. Seventy-five per cent. of fires are caused by carelessness, and can be prevented. Because of this, the official notice points out: "It is the obvious duty of municipal authorities, fire department officials, boards of trade and other representative citizen bodies to bring the matter to the attention of the people."

TORONTO FIRE CHIEF SUGGESTS SAFETY YEAR

Fire Chief Russell has written a letter to the general manager of the Ontario Safety League, suggesting that "instead of making a 'safety week,' why not go the limit and decide now to make it a safety year."

Chief Russell thinks most fires are due to carelessness, and adds: "The careless smoker is a fire fiend that costs the country a high price in lives and property. A smoker who insists upon smoking in bed the last thing that night, does one of the most foolhardy things imaginable. Not only does he jeopardize his own life, but others."
