Lime Baking Powders Must Go.

Official Expressions-"Royal" found to be the only absolutely pure baking powder.

Governor Hill, of New York (says a reporter of the N. T. Tribune), says: "I have been astonished lately at the extent of the adulteration of food. It would seem that every thing we eat is adulterated. " This adulteration of groceries is becoming a national evil—one that we shall have to adopt severe means to check." The machinery of the law cannot be put at work too speedily or teo vigorously against this wholesale adulteration of the things we eat. Both the health and the pockets of the people demand protection.

There is no article of food in general use more wickedly adulting the state of the people of the p

There is no article of food in general use more wickedly adulterated than baking powder. The New York State Board of Health has analyzed 84 different brands purchased in the State, and found most of them to contain alarm or lime, many to such an extent as to

render them seriously objectionable for use in food.

The sale of adulterated baking powders has been prohit statute in several States. It will be in the interests of the public health when their sale is made a misdemeanor everywhere, and the nalties of the law are rigidly enforced.

'The only baking powder yet found by chemical analysis to be entirely free from lime and absolutely pure is the "Royal," This perfect purity results from the exclusive use of cream of tartar specially refined and prepared by patent processes, which totally remove from it the tartrate of lime and other impurities. The cost of this chemically pure cream of tartar is much greater than any other. The high grade of the Royal Baking Powder has been fully established by official chemists.

Prof. Love, who made the analyses of baking powders for the New York State Board of Health, as well as for the Government, certifies to the purity and wholesomeness of the "Royal."

Prof. H. A. Morr, late Government chemist, says: "It is a scientific fact that the Royal Baking Powder is absolutely pure."

Dr. E. H. Bartley, chemist of the Brooklyn Department of Health, says (April 24, 1885): "I have recently analyzed samples of the Royal Baking Powder, purchased by myself in the stores of this city, and find it free from lime in any form."

Prof. McMusraus, chief chemist U. S. Department of Agri-

culture, Washington, D. C., says: "The chemical tests to which I have submitted the Royal Baking Powder prove it perfectly healthful, and free from every deleterious substance."

Bread, cake, biscutta, etc., repared with Royal Baking Powder will be lighter, sweeter, and more wholesome than if made, with

any other baking powder or leavening agent.
