Fredericton, N. CHIEF JUSTICE TUCK Honored on Attainment of Half Century as an Attorney.

you were appointed to the still higher position of Chief Justice of the province. Think your career at the bar you were always regarded as a prompt and laborious man, and the same spirit of industry has marked your judicial life. We cannot forget that you have given to the members of the profession with consideration and kindness and we desire most heartily and warmly to congratulate you upon attaining the jubilee of your entrance into our noble profession. We wish to assure you that the shadows are lengthening as you descend the western slope of life, yet we devoutly hope that you may yet spare many years of physical and intellectual vigor to preside over the Supreme Court of your native province. Signed on behalf of the Bar of the province.

Chief Justice Tuck was born in St. John on February 27, 1831, and despite his seventy-two years, is still hale and hearty, a recent attack of sciatica from which he has now completely recovered being the only illness he has known in the half century that he has been prominently before the public.

He is a descendant of Robert Tuck who, in 1636, settled at Watertown (Mass.) and later moved to New Hampshire. The grandfather of the present chief justice took up residence in the state of Maine and from there his son Moses came to St. John and for more than fifty years was a prominent citizen.

The present chief justice was educated at the Methodist institution in Vancouver, B. C., where he was called to the bar, and soon took rank as an able lawyer, conducting many important cases and filling many responsible positions, including that of clerk of the crown and recorder of the city of St. John.

He took an active part in political affairs, in behalf of the Conservative party and in 1882 was nominated one of their candidates for Ottawa. He was defeated but the party won and three years later he was appointed one of the judges of the New Brunswick court.

In 1891 he was made judge of the admiralty court, and in 1896 chief justice. He is a lecturer at the St. John Law School and professor of statutory law in King's College, Windsor. His friends are numbered only by his acquaintances.

Government Meeting. At the meeting of the local government held here Thursday afternoon, it is understood that decision was made to increase the stampage on amber cut in New Brunswick to \$1.25 a thousand feet upon spruce and pine and in proportion upon other timber.

This decision will be communicated to the Lumbermen's Association, which body recently submitted to the government a memorial in which \$1.25 was suggested as the highest figure to which the stampage ought to be raised.

The government also had other matters to deal with, but as one of the executive had to leave the city action on these was deferred. No successor to Dr. Bayard was appointed nor was a successor to Joseph Allison as a member of the Industrial School governors named.

The appointment of a new medical superintendent of the asylum was also deferred. Mrs. Louisa Hetherington, widow of Hedley Hetherington, was appointed to the position of matron at the asylum, succeeding Mrs. Young, who recently resigned. The appointment dates from November 1 and Mrs. Hetherington will on November 1 and Mrs. Hetherington will on the part of the King's Daughters' guild, have taken great interest in the work of the asylum and for years has been a very active and prominent part in its business and social activities. At an early period in your profession you became one of the clerks of the bar and for many years as clerk of the crown you had intimate connection with the administration of our criminal law as prosecuting officer, and still later as recorder of St. John you successfully legal adviser guarded the material interests of that city. Your elevation to the high and responsible position of judge of our Supreme Court in 1885 met with hearty approval, which was continued when in 1896

A STRONG, VIGOROUS MAN Is Liable to Break Down—Peru-na is Sure to Restore.

Hon. Frank Dunn, Alderman Twenty-Fourth District, writes from 232 East Fifty-Eighth Street, New York City: The Peru-na Medicine Co., Columbus, O. Gentlemen: "There is no remedy for a broken-down system that I know of which will so effectually restore health as Peru-na. Whenever I am overworked or suffer from the consequences of a cold a few doses of Peru-na builds me up again more quickly than anything I ever tried. I find it especially valuable for catarrh. Three bottles cured me three years ago of catarrh of the stomach and I have never had the least symptoms of it since."

Very truly, FRANK DUNN, Alderman 24th Dist., N. Y. City.

Peru-na is a medicine that gives tone to some part of the system. There are different kinds of tonics, but the tonic most needed in this country, where catarrh is so prevalent, is a tonic that operates on the mucous membranes. Peru-na is a tonic to the mucous membranes of the whole body. It gives tone to the capillary circulation which constitutes these delicate membranes. Peru-na is a specific in its operation upon the mucous membrane. It is a tonic that strikes at the root of all catarrhal affections. It gives tone to the minute blood vessels and the terminal nerve fibres. Catarrh cannot exist long where Peru-na is used intelligently. Peru-na seeks out catarrh in all the hidden parts of the body. Paul Landrum writing from Atlanta, Ga., says: "In January last I began the use of your Peru-na and Manilla for what was termed organic heart trouble. At that time I could scarcely walk to my place of business without stopping to rest and on arrival felt completely exhausted. I had severe pains in my heart and general dizziness. After using the first bottle of Peru-na I began to improve and today I feel that I am a sound man and I work fourteen hours a day without any bad feeling."—Paul Landrum. A. M. Ward, an employee of the C. B. & Q. R. Co., West Burlington, Ia., writes: "I had catarrh of the stomach and intestines for a number of years. I went to a number of doctors and got no relief. Finally one of my doctors sent me to Chicago and I met the same doctor. They said they could do nothing for me, that I had cancer of the stomach and there was no cure. I almost thought the same, for my breath was something awful. I could hardly stand it, it was so offensive. I could not eat anything without great misery, and I gradually grew worse. "Finally I got one of your books, and concluded I would try Peru-na, and thank God, I found a relief and a cure for that dreadful disease. I took five bottles of Peru-na and two of Manilla, and I now feel a good deal more than I did, better than Peru-na, and I keep a bottle in my house all the time."—A. M. Ward. If you do not derive prompt and satisfactory results from the use of Peru-na, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis. Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

BRITAIN FORMERLY THE WORKSHOP; NOW DUMPING GROUND OF THE WORLD.

Such is the Opinion of Bonar Law, Parliamentary Secretary of the Board of Trade, and He Says He Knows This from His Own Business.

Bonar Law, parliamentary secretary to the board of trade, was among his constituents recently addressing them at Glasgow. Arguing that great changes have been made in the fiscal situation, he said: "The manager of one of the lines trading between this country and Rotterdam told him a few days ago that formerly their whole profits were derived from the outward trade, whereas nowadays this was completely changed—the profits now came entirely from the inward trade. At the same time, the characters of the cargoes had entirely changed. Formerly they consisted of raw material from Germany and manufactured goods from this country. Now we sent to Germany nothing practically but raw material, largely coal, and what we brought back from Germany was manufactured goods of every kind, from umbrellas to steam cranes, which were being laid down now in a Clyde shipping yard. (Cheers.) Finally, he could say from his own experience that when he began business as a large part of the trade of his firm was the sending of iron goods from this country to the United States, and at that time they would just as soon have thought that it would be possible to import iron from the moon as from the United States. Before he ceased business, while they
