

All Skin Diseases Can be Directly Traced To BAD BLOOD.

Therefore to get rid of these skin diseases it is absolutely necessary that the blood should be thoroughly cleansed of the accumulated poisons, and for this purpose there is nothing to equal Burdock Blood Bitters.

This remedy has been on the market for over thirty-five years and when you use it you are not experimenting with some new and untried remedy.

Miss Stella Eichel, Maitland Forks, N.B., writes:—"I have been bothered with Salt Rheum on my hands for three years and it itched so I didn't know what to do. I tried everything but nothing seemed to be any good. I heard of Burdock Blood Bitters and bought two bottles of it, and now I am perfectly cured and have no Salt Rheum on my hands any more. I cannot speak too highly of Burdock Blood Bitters."

Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

F. G. James, Bowmanville, Ont.

The conductor of the old-fashioned slow-going London horse 'bus turned to the driver. "Look 'ere," he exclaimed disgustedly, "a bloke's just got in that wants yer to pull up at the next 'ouse after the fourth lamp-post wot's got yeller blinds!"

"Orl rite—orl rite!" responded John. "People ain't wearin' out their boot leather. I don't think! Just go an' ask 'im which part of the 'ouse 'e'd like to be druv to—inter the parlor, wi' the family, or hup to 'is room in the hattie!"

QUESTIONS AND ANSWERS. Miscellaneous.

INTEREST—MINERAL FOR ANALYSIS.

1. How much interest will come in a year on \$200, and \$21, at 5 per cent.?
2. Where could I send some mineral to be proved or analyzed? D. E.

Ans.—1. Interest on \$200, at 5 per cent., \$10, and on \$21, \$1.05.

2. We presume the Geological Survey, Ottawa, would attend to the matter for you, or you might send the sample to Prof. W. G. Miller, Provincial Geologist, Toronto, Ont.

ASSESSMENT EXEMPTION.

About the Assessment law: It provides exemption of income in municipalities not to exceed \$300. Now, some say, if you have only \$300 you are entirely exempt; if you have more, then you will be assessed the whole amount of your income, and others say they can only assess what is over \$300, and exempt the \$300. Now, what is really law? Please let me know in plain words, so that anyone can understand it. E. C. S.

Ontario.

Ans.—The \$300 exemption applies only to income derived from investments, deposits or loans where such income does not exceed \$300, and where the person is a householder or head of a family and is not in receipt of income from all sources exceeding \$300.

PUMPING AND PIPING WATER.

Have a rock well 720 feet from my barn. The water stands 8 feet from top of well. There is a fall of 3½ feet from well to barn. I wish to have the pump at the barn, as I think water will be fresher than standing in a supply tank or well at the barn. Water is to be used for household purposes also.

1. What sized piping would I use?
2. Would a cylinder below the pump be necessary?
3. If so, what size?
4. What kind of pump would I need?
5. Could I pump it by hand? W. J. B.

Ans.—1. The pipe should be as large in diameter as the spout of the pump. It will pump easier than if a smaller pipe is used.

2. No.
3. (See answer to No. 2.)
4. Any ordinary pump.
5. You could pump by hand, and, after the water once starts to come, pumping will be easier than if your pump were situated at the well, as the fall from the well to the barn will aid in the pumping.

The only objection to this arrangement is that it would take a considerable time to start the water, as it will first be necessary to pump out the air in the pipe.

WM. H. DAY.

PIPING—SEEDING—ROUP.

1. What size of pipe would be required to draw water from a 20-ft. well to stable, a distance of 200 feet? The stable floor is three feet lower than top of well. Would an ordinary pump answer the purpose?
2. Have a piece of low land (in sod) I intend summer-fallowing. Would like to seed it to permanent pasture for pasture next summer. When would you advise sowing seed?
3. Several hens have a swelling on left side of head, covering the eye. One of them seems all right again, only that she is blind of the eye. They are apparently as healthy and vigorous as the rest of the flock. J. W. G.

Ans.—1. Water could probably be drawn through a pipe of almost any size for a distance of 200 feet, but the larger the pipe, the less the friction, and the more easily will the pipe work. A wooden pump would, we think, work, if the pipe were not less than two inches in diameter.

2. Would sow grass seed on summer-fallow as early as practicable, in June, if possible.

3. Your hens are undoubtedly suffering from one of the forms of roup. The disease is infectious, and affected birds should be separated from the others. In the drinking water of the well fowls place some permanganate of potash, to every gallon about as much as will lie on a 5-cent piece. This is a good preventive.

Amatite ROOFING

Why the Buyer of Amatite Never Complains

When a man buys ordinary ready roofing he usually neglects to paint it and after three or four years he comes back to the dealer with a protest. It is human nature to neglect painting roofs.

When a man buys Amatite Roofing he lays it on his building and in three or four years it is still as good as new and does not need any paint. He forgets he has such a roof but no harm is done by that.

There is nothing to neglect in the case of Amatite. Amatite has a peculiar surface—a sort of plastic

Everjet Elastic Paint

A lustrous carbon black paint, very cheap, very durable—for protecting all kinds of metal and wood work.

THE PATERSON MANUFACTURING CO., Limited

Montreal Toronto Winnipeg Vancouver
St. John, N. B. Halifax, N. S.

concrete made of pitch and mineral matter.

This surface is plastic enough so that the material can be rolled up into handy rolls in the usual manner and handled just like any other ready roofing. When unrolled on the roof and nailed down it presents to the weather a continuous surface of mineral matter and pitch. On this surface wind, rain, storm, heat and cold have little effect. Year after year it looks up to the sky undisturbed and unaffected. It costs nothing to maintain and relieves the owner from all responsibility.

Dealers can improve their business by selling Amatite and buyers make a good bargain when they buy it. The price of Amatite is less than that of most painted roofings of less weight and durability.

Sample free on request.
